## **Electronic Media And The Transformation Of Law:**

**The Electronic Media and the Transformation of Law** M. Ethan Katsh, 1989 This is the first book to explore the broad influence of computers and television on the evolution of the US legal process      **The Medal of John Bayes** Thomas Shadwell, 1682      The Electronic Media and the Transformation of Law M. Ethan Katsh, 1989-07-27 Highly publicized legal cases such as those involving libel verdicts obscenity prosecutions the First Amendment and other areas of media law have focused attention on only one part of the media's impact on law This study the first to explore the broad influence of computers and television on the future of the legal process explains the critical role of information and argues that the influence of the new modes of communication can be seen in changes occurring in many areas of the law These areas include the goals and purposes of law the doctrines and rules of law the processes law uses to settle disputes and shape behavior the legal profession and the values and concepts that underlie our system of law      **Law in a Digital World** M. Ethan Katsh, 1995-05-25 The world of law is a world of information Rules judgments decisions interpretations and agreements all involve using and communicating information Today we are experiencing a significant transition from letters fixed on paper to information stored electronically The digital era where information is created stored and communicated electronically is quickly approaching if not already here The future of law will no longer be found in impressive buildings and leather bound books but in small pieces of silicon in streams of light and in millions of miles of wires and cable It will be a world of new relationships and greater possibilities for individual and group communication an environment where the value of information increases as it is shared In *Law in a Digital world* M Ethan Katsh explores how these new technologies will alter one of our most central institutions He considers the different ways in which people will not only electronically read and write but also interact with our vast storehouses of legal knowledge and information He envisions how sounds and pictures will play into the largely imageless print world of law and looks at the future importance of graphic and nontextual communication He explores how the flexible personalized organization of data will transform the way we gather information and whether information can or cannot be contained raising questions of copyright and privacy What happens to the law when information is more plentiful and accessible What happens to those people who suddenly have access to information never before available Does the use of information in a new form change the institution the user and those who come in contact with the user And what role does the lawyer play in all of this For citizens for lawyers for all those who will be part of the digital world rushing toward us Katsh answers these questions while considering the implications of this new era

Clark, 2007-07-10 This work will be very valuable for academic and public libraries supporting prelaw law social and cultural studies Summing Up Highly recommended Upper level undergraduates through professionals practitioners general readers CHOICE There are two aspects of scholarship about the legal systems of our day that are especially salient one being for the first time there is a fair amount of genuine research on legal systems and

two that this research is increasingly global As soon as you cross a jurisdictional line even if it separates countries that are very similar you enter a different legal system It cannot be assumed that any particular rule doctrine or practice is the same in any two jurisdictions regardless of how close these jurisdictions are in terms of history and tradition The Encyclopedia of Law and Society is the largest comprehensive and international treatment of the law and society field With an Advisory Board of 62 members from 20 countries and six continents the three volumes of this state of the art resource represent interdisciplinary perspectives on law from sociology criminology cultural anthropology political science social psychology and economics By globalizing the Encyclopedia s coverage American and international law and society will be better understood within its historical and comparative context Key Features Includes more than 700 biographical entries that are historical comparative topical thematic and methodological Presents the rich diversity of European Latin American Asian African and Australasian developments for the first time in one place to reveal the truly holistic interdisciplinary virtues of law and society Examines how and why legal systems grow and change how and why they respond or fail to respond to their environment how and why they impact the life of society and how and why the life of society impacts in turn these legal systems With borders more porous than ever before this Encyclopedia reflects the paradoxical reality of modern life including legal life This valuable resource aims to present research along with the theories on which it is grounded fairly and comprehensively and is a must have for all academic libraries

**Law and Society Approaches to Cyberspace** Paul Schiff Berman,2017-11-28 During the past decade the rise of online communication has proven to be particularly fertile ground for academic exploration at the intersection of law and society Scholars have considered how best to apply existing law to new technological problems but they also have returned to first principles considering fundamental questions about what law is how it is formed and its relation to cultural and technological change This collection brings together many of these seminal works which variously seek to interrogate assumptions about the nature of communication knowledge invention information sovereignty identity and community From the use of metaphor in legal opinions about the internet to the challenges posed by globalization and deterritorialization to the potential utility of online governance models to debates about copyright free expression and privacy this collection offers an invaluable introduction to cutting edge ideas about law and society in an online era In addition the introductory essay both situates this work within the trajectory of law and society scholarship and summarizes the major fault lines in ongoing policy debates about the regulation of online activity

*Collisions in the Digital Paradigm* David John Harvey,2017-03-23 It has been said that the only asset that a lawyer has is time But the reality

is that a lawyer's greatest asset is information. The practice and the business of law is all about information exchange. The flow of information travels in a number of different directions during the life of a case. A client communicates certain facts to a lawyer. The lawyer assimilates those facts and seeks out specialised legal information which may be applicable to those facts. In the course of a generation there has been a technological revolution which represents a paradigm shift in the flow of information and communication. Collisions in the Digital Paradigm is about how the law deals with digital information technologies and some of the problems that arise when the law has to deal with issues arising in a new paradigm. *The Law of the Future and the Future of Law* Sam Muller, Stavros Zouridis, Morly Frishman, Laura Kistemaker, 2012-10-31 Rights of robots, a closer collaboration between law and the health sector, the relation between justice and development, these are some of the topics covered in *The Law of the Future and the Future of Law* Volume II. The central question is how will law evolve in the coming years. This book gives you a rich array of visions on current legal trends. The readable think pieces offer indications of law's cutting edge. The book brings new material that is not available in the first volume of *The Law of the Future and the Future of Law* published in June 2011. Among the authors in this volume are William Twining, Emeritus Quain Professor of Jurisprudence, University College London; David Eagleman, Director Initiative on Neuroscience and Law; Hassane Cisse, Deputy General Counsel, The World Bank; Gabrielle Marceau, Counsellor, World Trade Organisation; Benjamin Odoki, Chief Justice, Republic of Uganda; Martijn W.
