Electronic Government Joel C. Willemassen, 2003 The federal government is increasingly interested in the use of smart cards credit card like devices that use integrated circuit chips to store and process data for improving the security of its many physical and information assets Besides better authentication of the identities of people accessing buildings and computer systems smart cards offer a number of potential benefits and uses such as creating electronic passenger lists for deploying military personnel and tracking immunization and other medical records Earlier this year GAO reported on the use of smart cards across the federal government GAO 03 144 GAO was asked to testify on the results of this work including the challenges to successful adoption of smart cards throughout the federal government as well as the government s progress in promoting this smart card adoption To successfully implement smart card systems agency managers have faced a number of substantial challenges sustaining executive level commitment in the face of organizational resistance and cost concerns obtaining adequate resources for projects that can require extensive modifications to technical infrastructures and software integrating security practices across agencies a task requiring collaboration among separate and dissimilar internal organizations achieving smart card interoperability across the government and maintaining the security of smart card systems and the privacy of personal information These difficulties may be less formidable as management concerns about facility and information system security increase and as technical advances improve smart card capabilities and reduce costs However such challenges which have slowed the adoption of this technology in the past continue to be factors in smart card projects Given the significant management and technical challenges associated with successful adoption of smart cards a series of initiatives has been undertaken to facilitate the adoption of the technology As the federal government s designated promoter of smart card technology GSA assists agencies in assessing the potential of smart cards and in implementation GSA has set up a governmentwide standards based contracting vehicle and has established interagency groups to work on procedures standards and guidelines As the government s policymaker OMB is beginning to develop a framework of policy

guidance for governmentwide smart card adoption In a July 2003 memorandum OMB described a three part initiative on authentication and identity management in the government consisting of 1 developing common policy and technical guidance 2 executing a governmentwide acquisition of authentication technology including smart cards and 3 selecting shared service providers for smart card technology These efforts address the need for consistent up to date standards and policy on smart cards but both GSA and OMB still have much work to do before common credentialing systems can be successfully implemented across government agencies
