Elementary Instructions For Students Of Sculpture:

Elementary Instructions for Students of Sculpture Francesco Carradori, 2002 Carradori's book of instructions is vital to understanding the art and craft of sculpting as they were practiced before the twentieth century since little substantial material exists that demonstrates in an informed didactic manner the various tools and techniques used by ancient sculptors Carradori's work is the most comprehensive and instructive it includes thirteen articles that explain how to restore marble sculpture model clay work with stucco and wax cast and finish bronze and how to carve and enlarge models into marble and stone as well as seventeen tables that illustrate the arrangement methods and tools used in each of these processes The book also includes the complete Italian text Jacket *Francesco Corradori (1747-1824)* Matti Kalevi Auvinen, 2002 **Casting**

the Parthenon Sculptures from the Eighteenth Century to the Digital Age Emma M. Payne, 2021-04-08 Through the 19th century as archaeology started to emerge as a systematic discipline plaster casting became a widely adopted technique newly applied by archaeologists to document and transmit discoveries from their expeditions The Parthenon sculptures were some of the first to be cast In the late 18th century and the first years of the 19th century the French artist Fauvel and Lord Elgin's men conducted campaigns on the Athenian Acropolis Both created casts of parts of the Parthenon sculptures that they did not remove and these were sent back to France and Britain where they were esteemed and displayed alongside other original sections Henceforth casting was established as an essential archaeological tool and grew exponentially over the course of the century Such casts are now not only fascinating historical objects but may also be considered time capsules capturing the details of important ancient works when they were first moulded in centuries past This book examines the role of 19th century casts as an archaeological resource and explores how their materiality and spread impacted the reception of the Parthenon sculptures and other Greek and Roman works Investigation of their historical context is combined with analysis of new digital models of the Parthenon sculptures and their casts Sensitive 3D imaging techniques allow investigation of the surface markings of the objects in exceptionally fine detail and enable quantitative comparative studies comparing the originals and the casts The 19th century casts are found to be even more accurate but also complex than anticipated through careful study of their multiple layers we can retrieve surface information now lost from the originals through weathering and vandalism **Supports in Roman Marble Sculpture** Anna Anguissola, 2018-02-15 The first study of a crucial aspect of Roman stone sculpture exploring the functions and aesthetics of non figural supports

Exhibiting Antonio Canova Christina Ferando, 2025-10-01 *Exhibiting Antonio Canova* Display and the Transformation of Sculptural Theory argues that the display of Canova's sculptures in the late eighteenth and early nineteenth centuries acted as a catalyst for discourse across a broad range of subjects By enshrining his marble figures alongside plaster casts of ancient works bathing them in candlelight staining and waxing their surfaces and even setting them in motion on rotating bases Canova engaged viewers intellectually physically and emotionally These displays inspired discussions on topics as diverse as

originality and artistic production the association between the sculptural surface flesh and anatomy the relationship between painting and sculpture and the role of public museums Beholders discussions also shaped the legacy of important sculptural theories They helped usher in their modern definitions and created the lenses through which we experience and interpret works of art establishing modern attitudes not just towards sculpture but towards cultural patrimony in general

Pompeii in the Visual and Performing Arts Mirella Romero Recio, 2023-05-18 This volume examines the influence that Pompeii and to a lesser extent Herculaneum had on the visual and performing arts in Spain and countries across South America Covering topics from architecture painting and

decorative arts to theatre dance and photography the reader will gain insight into the reception of classical antiquity through the analysis of the close cultural ties between both sides of the Atlantic in the past and the present Each contribution has been written by a specialist researcher participating in the project The Reception and Influence of Pompeii and Herculaneum in Spain and Ibero America funded by the Spanish Ministry of Science and Innovation PGC2018 093509 B I00 Ministry of Science and Innovation AEI ERDF EU Pompeii in the Visual and Performing Arts begins by examining the influence of Pompeian architecture in Spain in paintings that depict scenes inspired by Roman scenes and also buildings modelled on those of Pompeii Next the influence of Pompeii crosses the Atlantic to Mexico with a study of the archaeological site s influence on the visual and performing arts An exploration of the elitist use of the ancient past in architecture is seen in Chilean architecture which leads onto an investigation of the new art styles that emerged in the 19th century Later chapters look into the influence of the ancient frescoes and the use of modern plaster casts of statues The final chapters are devoted to comics and photography which also make a study of the places in Latin America nicknamed Pompeii in the 20th and 21st centuries "Exhibiting Outside the Academy, Salon and Biennial, 1775-1999 " Andrew Graciano,2017-07-05 In recent years there has been increasing scholarly interest in the history of museums academies and major exhibitions There has been however little to no sustained interest in the histories of alternative exhibitions single artwork solo artist artist mounted entrepreneurial privately funded ephemeral etc with the notable exception of those publications that deal with situations involving major artists or those who would become so for example J L David s exhibition of Intervention of the Sabine Women 1799 and The First Impressionist Exhibition of 1874 despite the fact that these sorts of exhibitions and critical scholarship about them have become commonplace and no less important in the contemporary art world The present volume uses and contextualizes eleven case studies to advance some overarching themes and commonalities among alternative exhibitions in the long modern period from the late eighteenth to the late twentieth centuries and beyond These include the issue of control in the interrelation and elision of the roles of artist and curator and the relationship of such alternative exhibitions to the dominant modes structures of display and cultural ideology *Playing with Fire* James David Draper,Guilhem Scherf,Metropolitan Museum of Art (New York, N.Y.),2004 European sculptors of the Neoclassical period often modelled their works in clay before producing finished pieces in marble This book offers a comprehensive overview of Neoclassical terracotta models by European artists featuring the works of Pajou Houdon and Canova among many others **Twelve Caesars** Mary Beard,2021-09-28 From the bestselling author of SPQR A History of Ancient Rome the fascinating story of how images of Roman autocrats have influenced art culture and the representation of power for more than 2 000 years What does the face of power look like Who gets commemorated in art and why And how do we react to statues of politicians we deplore In this book against a background of today s sculpture wars Mary Beard tells the story of how for more than two millennia portraits of the rich powerful and famous in the western world have been shaped by the image of Roman emperors especially

the Twelve Caesars from the ruthless Julius Caesar to the fly torturing Domitian Twelve Caesars asks why these murderous autocrats have loomed so large in art from antiquity and the Renaissance to today when hapless leaders are still caricatured as Neros fiddling while Rome burns Beginning with the importance of imperial portraits in Roman politics this richly illustrated book offers a tour through 2 000 years of art and cultural history presenting a fresh look at works by artists from Memling and Mantegna to the nineteenth century American sculptor Edmonia Lewis as well as by generations of weavers cabinetmakers silversmiths printers and ceramicists Rather than a story of a simple repetition of stable blandly conservative images of imperial men and women Twelve Caesars is an unexpected tale of changing identities clueless or deliberate misidentifications fakes and often ambivalent representations of authority From Beard s reconstruction of Titian s extraordinary lost Room of the Emperors to her reinterpretation of Henry VIII s famous Caesarian tapestries Twelve Caesars includes fascinating detective work and offers a gripping story of some of the most challenging and disturbing portraits of power ever created Published in association with the Center for Advanced Study in the Visual Arts National Gallery of Art Washington DC

The Borghese Collections and the Display of Art in the Age of the Grand Tour Carole Paul, 2017-07-05 The redecoration of the exhibition spaces at the Borghese palace and villa undertaken together with the reinstallation of the family s vast art collections was one of the most important events in the cultural life of eighteenth century Rome In this comprehensive study Carole Paul reconstructs the planning and execution of the project and explains its multifaceted significance its place in the history of Italian art architecture and interior design at a complex moment of transition from baroque to neoclassical style as well as its unrecognized but profound influence on the development of the modern art museum The study shows how the installations and decorations worked together to evoke traditional themes in innovative ways Addressed primarily to a new audience of tourists from abroad the thematic content of the spaces celebrated the greatness of the Borghese family and of Roman tradition while their stylistic diversity and sophistication made a case for the continued vitality even modernity of Roman art and culture Designed for the exercise of a highly refined social performance these sites helped to model the experience of art as a form of enlightened modern civility
