The Bookseller, Newsdealer and Stationer ,1899 **Strategies of Synthetic Bioactive Molecules** Professor (Dr.) Jyotirmaya Sahoo,Professor (Dr.) P. Sudhir Kumar, In order to gain a better understanding of the chemical molecules available in nature scientists synthesize those molecules and investigated their structural environment For the synthesis of a complex molecule considerable number of individual reactions leading in sequence from available starting materials to the desired end product Molecules are made up of atoms of different elements joined together by chemical bonds To plan the route of chemical synthesis scientists usually visualize the end product and work backward toward increasingly simpler molecules For many molecules it is possible to establish alternative synthetic routes The ones actually used depend on many factors such as cost and availability of starting materials the amount of energy needed to make the reaction proceed at a satisfactory rate and the cost of separating and purifying the end products Moreover knowledge of the reaction mechanism and the function of the chemical structure or behaviour of the functional groups helps to accurately determine the most favoured pathway that leads to the desired reaction product The authors of this book put their effort to bring strategies for the synthesis of few bioactive molecules in the institutional laboratory Basically the strategies are planned for the under graduate level pharmacy students as per the curriculum prescribed by Pharmacy Council of India Seminar Proceedings ,1990 **Molecular Orbital Studies in Chemical Pharmacology** Lemont B. orbital studies in chemical pharmacology was held at the Battelle Seattle Research Center of Battelle Memorial Institute in Seattle Washington U S A on October 20 22 1969 This volume is a collection of the lectures presented at that symposium The use of quantum mechanics to study the actions of molecules of biological importance is being developed by a number of scientists concerned with these phenomena The advent of high speed computers has made possible the application of this technique to large molecules of the kind important in living systems One result of this expanded computational ability has been the utilization of molecular orbital theory by a group of scientists of diverse backgrounds The lecturers at this symposium all interested in molecular orbital theory have backgrounds in pharmacology physical chemistry theoretical chemistry biochemistry and medicinal chemistry The common denominator among these scientists has been the realization that they must search at the primary level of chemical events for explanations of biological phenomena Since these events are governed to a large extent by the properties of the valence electrons of molecules molecular orbital theory offers great promise in explaining and predicting biological phenomena October 1969 Lemont B Kier Table of Contents v Preface BERNARD PULLMAN Electrons in Nucleic Acids and their Constituents JAMES R HOYLAND Semiempirical MO Theories A Critique and 31 a Review of Progress *Drug Design* E.
