Elementary Classroom Management Molly E. Romano, Carol Simon Weinstein, 2022 As we prepare each new edition of this book we engage in an extensive review of the current literature on classroom management

including books journal articles and online resources We take what we read and apply it to the text by updating references adding fresh concepts and incorporating new findings into the text This current edition however benefited from an additional source of material and inspiration What we found from both the literature review and firsthand experience is that the way we originally framed our ideas about classroom management continues to hold up after several editions of the text The new topics today are simply reiterations of our original ideas Perhaps they are framed in a different way or are given a new name but essentially what makes classroom management effective remains the same In short both our research and our experiences support our belief that most problems of classroom disorder can be avoided if teachers foster positive relationships with students implement engaging instruction and use good preventive management strategies We have however seen a shift in the way people are talking about education in general or what is important in schools today Our previous edition identified the hot topics in education as increasing academic achievement implementing core curriculum standards incorporating technology into the curriculum bullying reducing the achievement gap among students from different racial ethnic and economic backgrounds and assessing students learning Although these topics remain relevant in schools today our newest review found that classroom management has come to the forefront of the discussion on how we can achieve academic success and protect the well being of all of our students In recent years there has been an increased amount of research on building strong teacher student relationships engaging in culturally responsive teaching directly teaching social skills and increasing opportunities for students to respond in the learning process In this current edition we have incorporated these new findings into our existing discussions of these issues
