Listening Automaticity: A Reduction of Dual-Task Interference and Working Memory Demands Bartolo Bazan,2024-10-24 SUMMARY This book explores the concept of automaticity in the context of second language listening focusing on how practice can lead to the ability to perform listening tasks with minimal cognitive effort The author argues that through practice lower level subcomponents of listening can be executed autonomously requiring less executive control and reducing dual task interference an indication of automaticity Despite the extensive research on automatization across various skills this book addresses a gap in the literature regarding second language listening from a cognitive psychology perspective It integrates theories from cognitive sciences such as attentional theories of skill acquisition working memory and imagery with linguistic concepts to create a comprehensive framework for investigating listening automaticity Key features of the study include an examination of what types of practice are most effective in fostering listening automaticity The book discusses innovative approaches to assessing listening automaticity including the use of combined tests to evaluate constructs accurately Additionally the research investigates whether practice leads to a decrease in the involvement of executive functions during listening tasks and explores the potential of visuospatial working memory as a predictor of listening automaticity Utilizing Rasch models the research offers validation for the cognitive and linguistic measures employed linking longitudinal data through common items to provide deeper insights into the automatization process The implications of this research extend to both theoretical understanding and practical applications in pedagogy making it relevant for educators researchers and students in cognitive psychology psycholinguistics and assessment Overall the book aims to contribute to the

advancement of automaticity research particularly in the realm of second language acquisition Assessing Listening for Chinese English Learners Pan Zhixin, 2016-12-08 This book reports in detail the newly developed Communicative Listening Comprehension Test CLCT for the National College English Test CET of China Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer 1996 in particular the project develops CLCT for CET 4 and CET 6 The research begins with the construction of frameworks of listening task characteristics and communicative listening ability Subsequently based on a survey of Chinese college students English listening needs and an analysis of listening tasks in influential English listening course books and public tests CLCT 4 and CLCT 6 test specifications are developed Finally sample papers are produced and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly developed notes completion task type in two CLCT tests As an example of successful integration of communicative testing theories and test construction practice this research provides valuable insights into listening test development for other large scale tests *Training Foreign Language Teachers* British Council, Goethe Institut, Association des universités partiellement ou entièrement de langue française, 1987 **Teaching Arabic as a Foreign Language** Mohammad T.
