Exploring the Mind of God: An Introduction to Shi'ite Legal Epistemology Hashim Bata, 2023-05-25 This book introduces readers to the legal epistemology that is advocated within Twelver Shi'ite *u l al fiqh* legal theory. It critically surveys the epistemological underpinnings upheld by post 19th century *U l* clerics that impel them to mainly deduce and interpret Sharia using scripture and literalist hermeneutical methods. An evaluation of these underpinnings uncovers the important juxtaposition that exists between the seminarian discourses of *u l al fiqh* and philosophy. The book hypothesises that *u l al fiqh* has both space and historical precedence to accept alternative epistemological theories that may enable orthodox Shi'ite clerics to display greater dynamism in deducing and interpreting Sharia.

Avicenna on the Ontology of Pure Quiddity Damien Janos, 2020-05-05 This study focuses on the metaphysics of the great Arabic philosopher Avicenna or Ibn Sina d. 1037 C.E. More specifically, it delves into Avicenna's theory of quiddity or essence, a topic which seized the attention of thinkers both during the medieval and modern periods. Building on recent contributions in Avicennian studies, this book proposes a new and comprehensive interpretation of Avicenna's theory of the pure quiddity, also known as the quiddity in itself and of its ontology. The study provides a careful philological analysis of key passages gleaned from the primary sources in Arabic and a close philosophical contextualization of Avicenna's doctrines in light of the legacy of ancient Greek philosophy in Islam and the early development of Arabic philosophy, *falsafah* and theology, *kalām*. The study pays particular attention to how Avicenna's theory of quiddity relates to the ancient Greek philosophical discussion about the universals or common things and Mu'tazilite ontology. Its main thesis is that Avicenna articulated a sophisticated doctrine of the ontology of essence in light of Greek and Bahshamite sources which decisively shaped subsequent intellectual history in Islam and the Latin West.

An Anthology of Philosophy in Persia, Vol. 5 S. H. Nasr, Mehdi Aminrazavi, 2014-11-17 Persia is home to one of the few civilizations in the world that has had a continuous tradition of philosophical thought lasting more than two and a half millennia. From the time Zoroaster brought the Gathas, the sacred scripture of Zoroastrianism, until today, it has had a philosophical tradition comprising diverse schools and various languages including Avestan and Pahlavi as well as Arabic and Persian. The West has seen surveys of Persian art and anthologies of Persian literature, but this work is the first to present a millennial tradition of philosophy in Persia in the form of translated selections and introductory sections for each period and figure. Existing translations have been used where possible, but most of the selections have been newly translated for this work, which with the help of the explanatory introductions makes possible an intellectual journey into a philosophical continent much of which has been uncharted for Westerners until now. The fifth and final volume of *An Anthology of*

Philosophy in Persia deals with some seven centuries of Islamic thought stretching from the era following the Mongol invasion to the end of the Qajar period Organized around the cities which became the main centres of philosophical activity during this long period the volume is divided into three parts The School of Shiraz whose importance not only for Persia but also for Ottoman Turkey and Muslim India is only now being recognized The School of Isfahan which marks the integration of some eight centuries of Islamic thought and culminates with Mulla Sadra and finally The School of Tehran where traditional philosophy first encountered modern thought in Persia bringing this series into present times Science as a Gateway to Understanding National Research Council,Policy and Global Affairs,Development, Security, and Cooperation,Office for Central Europe and Eurasia,2008-12-20 In October 2007 the U S National Academies and the Iranian Institute for Advanced Studies in Basic Science organized the first of a series of planned U S Iranian workshops on the topic Science as a Gateway to Understanding This new workshop series is a component of the broader effort of the National Academies to support bilateral workshops and exchange visits in a variety of fields with a number of Iranian institutions that began in 2000 This book includes papers that were presented at the workshop and summaries of the discussions that followed some of the presentations At the conclusion of the workshop there was general agreement that the presentations on many aspects of science and scientific cooperation that have a bearing on mutual understanding were an important first step Several participants underscored that the next workshop should emphasize how scientific cooperation can lead in concrete terms to improved understanding among both academic and political leaders from the two countries محمد رضا رستم محمد رستم Mohammed Rustom,2022-04-26 The Essence of Reality consists of one hundred brief chapters interspersed with Qur anic verses prophetic sayings Sufi maxims and poetry The book takes readers on a philosophical journey with expositions of questions including the problem of the eternity of the world the nature of God s essence and attributes the concepts of before and after and the soul s relationship to the body *Philosophy and the Spiritual Life* Victoria S. Harrison,Tyler Dalton McNabb,2023-07-01 This book breaks new ground for the philosophy of religion by showcasing work that engages with the lived reality of the spiritual life It demonstrates that philosophy s relationship with spirituality is more than a historical curiosity and that in the twenty first century it is still meaningful to think about philosophy in connection with spirituality The chapters are organised around the following themes spiritual practice and philosophical understanding philosophical reflections on living a spiritual life philosophical problems concerning the spiritual life The first part discusses whether or not the topic of spirituality should be given a more fundamental role within the philosophy of religion and if so how that might be accomplished The second part addresses fundamental issues concerning human beings their lives and their self understanding in relation to the spiritual life The final part considers philosophical problems that emerge when discussing the spiritual life By bringing together discussions of these topics this volume constitutes a valuable resource for scholars in disciplines in which the spiritual life is a focus of interest particularly philosophy theology and religious studies The

Taylor, Luis Xavier López-Farjeat, 2015-08-20 This valuable reference work synthesizes and elucidates traditional themes and issues in Islamic philosophy as well as prominent topics emerging from the last twenty years of scholarship Written for a wide readership of students and scholars The Routledge Companion to Islamic Philosophy is unique in including coverage of both perennial philosophical issues in an Islamic context and also distinct concerns that emerge from Islamic religious thought This work constitutes a substantial affirmation that Islamic philosophy is an integral part of the Western philosophical tradition Featuring 33 chapters divided into seven thematic sections this volume explores the major areas of philosophy Logic Metaphysics Philosophy in the Sciences Philosophy of Mind Epistemology and Ethics Politics as well as philosophical issues salient in Islamic revelation theology prophecy and mysticism Other features include A focus on both the classical and post classical periods A contributing body that includes both widely respected scholars from around the world and a handful of the very best younger scholars Reference and Further Reading sections for each chapter and a comprehensive index for the whole volume The result is a work that captures Islamic philosophy as philosophy In this way it serves students and scholars of philosophy and religious studies and at the same time provides valuable essays relevant to the study of Islamic thought and theology
