**Sieve Elements** H.-D. Behnke,R.D. Sjolund,2012-12-06 This detailed overview of the structure of the sieve elements of the major plant groups from algae to flowering plants includes extant and extinct groups revealing both common and divergent solutions to the problem of long distance assimilate transport      *Sex and Death in Protozoa* Graham Bell,1988 Is ageing inevitable or can senescence and death be evaded Large animals and plants always age if they live long enough even individual cells from their bodies cannot continue living and dividing indefinitely Whether or not single celled organisms also age and die and what relation sex bore to the process of senescence was the subject of vigorous debate and experimentation early in the last century In this book Dr Bell disinters and reanalyzes these forgotten experiments and argues that protozoan lineages do indeed senesce as the result of an accumulated load of mutations that can be shed only through sexual reproduction This unexpected connection between sex and death is the central theme of a book that will interest all students of evolutionary biology sexuality and senescence      **Physical Review**,1920 Vols for 1903 include Proceedings of the American Physical Society      Scientific American Monthly Alexander Russell Bond,1920      **Scientific American**,1919

**Unified theory of the field and structure of the universe** Аркадий Серков,2022-01-11 The book examines the issues of the general structure and functioning of matter including the macro and micro world establishes a connection between them and gives a forecast for the development of the world      *A Dictionary of Applied Physics* Richard Glazebrook,1922

TV no computers no science of molecular biology no understanding of DNA no genetic engineering In Search of Schrodinger's Cat tells the complete story of quantum mechanics a truth stranger than any fiction John Gribbin takes us step by step into an ever more bizarre and fascinating place requiring only that we approach it with an open mind He introduces the scientists who developed quantum theory He investigates the atom radiation time travel the birth of the universe superconductors and life itself And in a world full of its own delights mysteries and surprises he searches for Schrodinger's Cat a search for quantum reality as he brings every reader to a clear understanding of the most important area of scientific study today quantum physics In Search of Schrodinger's Cat is a fascinating and delightful introduction to the strange world of the quantum an essential element in understanding today's world *Verification of the P. Laplace's hypothesis "on the transformation of gravitational forces in molecular"* Аркадий Серков, Антон Серков, 2022-05-17 This book was first published in Russian in 2014 The main idea of the book was to try to prove that the basis of all physical and chemical processes is mass or rather the interaction of masses of elementary particles and not mythical electric charges It can say that a significant part of the author's life was devoted to this All this time the author was inspired by the idea hypothesis of PS Laplace that the forces acting between the molecules of matter are transformed modified gravitational forces To prove the hypothesis put forward Laplace carried out calculations in which he showed that in the transition from gravitational forces to molecular forces the density of matter in elementary particles increases 10 10 times Such a significant increase in the density of matter leads to an increase in the intensity of gravitational forces their transformation into molecular ones

**Hypotheses-3. Genesis and Evolution of Atoms and space bodies** Аркадий Серков, Антон Серков, Алексей Серков, 2021-02-26 Book Hypotheses 3 Genesis and Evolution of Atoms and Cosmic Bodies is the final one in the series Hypotheses Serkov AT The first book in this series was published in 1998 This book examines the formation of chemical elements their evolution and decay The initial product is hydrogen protons which is formed by condensation of sub elementary particles and during nuclear reactions by the mechanism of the formation of secondary drops when a drop of nuclear liquid hits the surface of the liquid nucleus of an atom crown splash effect An increase in the mass of atoms occurs as a result of the orbital capture of atoms of light elements their subsequent deceleration and fall on the nucleus as a result of which the frequency of rotation of nuclei increases leading to periodic disruption of dynamic boundary layers and accordingly to a periodic change in the properties of chemical elements An increase in the speed of rotation of stars with an increase in their mass indicates the occurrence of similar processes in space and the main sequence in the Hertzsprung Russell diagram reflects the process of an increase in the mass of stars due to orbital captures of red and brown dwarfs Periodic changes in the properties of exoplanetary systems are predicted depending on the mass of stars in particular their sizes *The Historians' History of the World: These eventful years (part II)* Henry Smith Williams, 1926
