

CYNTHIA MOSS

Elephant Memories

WITH A NEW AFTERWORD

"One is soon swept away by this 'Behar' for adults. By the end, one wants to raise human civilisations and cry out, 'Now God stand up for the elephants!'"
—Christopher Isherwood, *Elephant*, New York Times

Elephant Memories

Richard Louv

Elephant Memories:

Elephant Memories Cynthia Moss, 2000 Cynthia Moss has studied the elephants in Kenya's Amboseli National Park for over twenty seven years Her long term research has revealed much of what we now know about these complex and intelligent animals Here she chronicles the lives of the members of the T families led by matriarchs Teresia Slit Ear Torn Ear Tania and Tuskless With a new afterword catching up on the families and covering current conservation issues Moss's story will continue to fascinate animal lovers One is soon swept away by this Babar for adults By the end one even begins to feel an aversion for people One wants to curse human civilization and cry out Now God stand up for the elephants Christopher Lehmann Haupt New York Times Moss speaks to the general reader with charm as well as scientific authority An elegantly written and ingeniously structured account Raymond Sokolov Wall Street Journal Moss tells the story in a style so conversational that I felt like a privileged visitor riding beside her in her rickety Land Rover as she showed me around the park Sarah Blaffer Hrdy New York Times Book Review A prose poem celebrating a species from which we could learn some moral as well as zoological lessons Chicago Tribune

Elephant Dan Wylie, 2009-01-15 Aristotle characterized the elephant as the beast which passeth all others in wit and mind and the animal has long figured in cultural artifacts even on continents it has never inhabited Now Elephant provides an engaging look at the elephant's long life

Elephant Destiny Martin Meredith, 2004-06-30 An illuminating history of one of the earth's most magnificent creatures and a passionate plea to save it from extinction *the elephant remembers* Steven

Ross Keith, 2008-10-09 a volume of poetry first copy shop published in 1989 entered into multiple poetry contests contents acknowledged but never printed the third volume of a series of seven transcribed from bar napkins old journals and typed on a manual smith corona a part of a seven book series based on past writing sophomoric as it may be this is the volume that turns the corner for me here i believe as does my editor Pati Bubach the wonder of the sky is blue is trumpeted here as the center f the world the p ace where i as a writer moved up

Adventures in Memory Hilde Østby, Ylva Østby, 2018-10-09 A novelist and a neuroscientist uncover the secrets of human memory What makes us remember Why do we forget And what exactly is a memory With playfulness and intelligence Adventures in Memory answers these questions and more offering an illuminating look at one of our most fascinating faculties The authors two Norwegian sisters one a neuropsychologist and the other an acclaimed writer skillfully interweave history research and exceptional personal stories taking readers on a captivating exploration of the evolving understanding of the science of memory from the Renaissance discovery of the hippocampus named after the seahorse it resembles up to the present day Mixing metaphor with meta analysis they embark on an incredible journey diving for seahorses for a memory experiment in Oslo fjord racing taxis through London and time traveling to the future to reveal thought provoking insights into remembering and forgetting Along the way they interview experts of all stripes from the world s top neuroscientists to famous novelists to help explain how memory works why it sometimes fails and what we can do to improve it Filled with cutting edge research and nimble storytelling the result is a charming and memorable adventure through human memory

Thirty-Three Ways of Looking at an Elephant Dale Peterson, 2020-10-20 Elephants have captivated the human imagination for as long as they have roamed the earth appearing in writings and cultures from thousands of years ago and still much discussed today In Thirty Three Ways of Looking at an Elephant veteran scientific writer Dale Peterson has collected thirty three essential writings about elephants from across history with geographical perspectives ranging from Africa and Southeast Asia to Europe and the United States An introductory headnote for each selection provides additional context and insights from Peterson s substantial knowledge of elephants and natural history The first section of the anthology Cultural and Classical Elephants explores the earliest mentions of elephants in African mythology Hindu theology and Aristotle and other ancient Greek texts Colonial and Industrial Elephants finds elephants in the crosshairs of colonial exploitation in accounts pulled from memoirs commoditizing African elephants as a source of ivory novel targets for bloodsport and occasional export for circuses and zoos Working and Performing Elephants gives firsthand accounts of the often cruel training methods and treatment inflicted on elephants to achieve submission and obedience As elephants became an object of scientific curiosity in the mid twentieth century wildlife biologists explored elephant families and kinship behaviors around sex and love language and self awareness and enhanced communications with sound and smell The pieces featured in Scientific and Social Elephants give readers a glimpse into major discoveries in elephant behaviors Endangered Elephants points to the future of the elephant whose numbers continue

to be ravaged by ivory poachers Peterson concludes with a section on fictional and literary elephants and ends on a hopeful note with the 1967 essay Dear Elephant Sir which argues for the moral imperative to save elephants as an act of redemption for their systematic abuse and mistreatment at human hands Essential to understanding the history and experience of this beloved and misunderstood creature Thirty Three Ways of Looking at an Elephant is a must for any elephant lover or armchair environmentalist

Elephants: Love and Labour Pasquale De Marco, 2025-04-19 Elephants are one of the most intelligent and social animals on the planet They have a complex social structure a rich emotional life and a deep spiritual connection to their environment In this book we will explore the many facets of elephants from their cognitive abilities to their role in human culture We will learn about the challenges they face in the wild and the threats they face from humans We will also explore the ways in which we can help elephants and ensure their survival This book is a comprehensive guide to elephants covering everything from their biology and behavior to their history and cultural significance It is a must read for anyone who loves elephants or who wants to learn more about these amazing creatures In this book you will learn about The cognitive abilities of elephants The social structure of elephants The emotional life of elephants The role of elephants in human culture The challenges facing elephants The ways in which we can help elephants This book is written in a clear and concise style and it is packed with beautiful photographs and illustrations It is a valuable resource for anyone who wants to learn more about elephants Elephants are facing a number of challenges including habitat loss poaching and climate change If we do not take action to protect elephants they could disappear from the wild within a few generations This book is a call to action We must all work together to protect elephants and ensure their survival We must educate ourselves about the challenges they face and we must support organizations that are working to protect them We must also change our own behavior We must reduce our consumption of resources and we must choose products that are not made from elephant ivory We must also support sustainable tourism that does not harm elephants By taking these actions we can help to ensure that elephants will continue to roam the earth for generations to come If you like this book write a review on google books

The Social Behavior of Older Animals Anne Innis Dagg, 2009-02-02 A groundbreaking study on the lives of senior mammals and birds from the aging of alphas to the role of grandmothers by the author of Animal Friendships How do young and old social animals view each other Are aged animals perceived by others as weaker Or wiser What is the relationship between age and power among social animals Taking a cue from Frans de Waal s seminal work examining the lives of chimpanzees Anne Innis Dagg in this pioneering study probes the lives of older mammals and birds Synthesizing the available scientific research and anecdotal evidence she explores how aging affects the lives and behavior of animals ranging from elk to elephants and gulls to gorillas examining such topics as longevity how others in a group view senior members in regard to leadership wisdom and teaching mating success interactions with mates and offspring how aging affects dominance changes in aggressive behavior and adaptability and death and dying At once instructive and compelling this theme spanning

book reveals the complex nature of maturity in scores of social species and shows that animal behavior often displays the same diversity we find in ourselves Dagg's book should be a corrective to us all species that lose or ignore the contributions of their older members do so at their peril Literary Review of Canada Humans and chimps it turns out value age in sexual partners very differently In our species youth is prized but among chimps the reverse is the case The New York Review of Books Wild Health Cindy Engel, 2003-03 As Dr Engel emphasizes in this enticing well referenced and entertaining book Science we can learn a lot about human health by studying animal behavior in the wild Indeed some of the natural holistic and alternative human medicine being practiced today arose through the observation of wild animals In this groundbreaking work Dr Engel points out fascinating parallels between animal and human medicine She offers intriguing examples of how animals prevent and cure sickness and poisonings heal open wounds balance their diets and regulate fertility For instance chimpanzees carefully eat bitter tasting plant medicines that counter intestinal parasites elephants roam miles to find the clay they ingest to counter dietary toxins broken legged chicks have been known to eat analgesic foods that alleviate pain By observing wild health we may discover or rediscover ways to benefit our own health As Craig Stotlz of the Washington Post noted this highly readable assessment triggers more outside the double helix thoughts about human health than anything I've read recently **Animal Cognition** Clive D.L. Wynne, Monique A. R. Udell, 2020-11-27 Thoroughly updated for its third edition with the latest research in the field this innovative text delivers an apt and comprehensive introduction to the rich and complex world of animal behaviour and cognition Discover pivotal case studies and experiments that have irrevocably shaped how we view the psychological and social lives of animals and discover such key cognitive topics as memory communication and sensory perception Projecting an insightful scope into the cognitive world of animals from considering the use of tools in birds to the dance communication system of the honey bee Wynne and Udell analyse and explain the importance of the observations and studies that have led to the greater understanding of how animals learn perceive social relations form concepts experience time and navigate space Written by two leading researchers in the field including the author of the best selling popular science book Dog is Love this textbook is a complete resource for students of animal cognition animal behaviour or comparative psychology The Aesop's Fable Paradigm K. Brandon Barker, Daniel J. Povinelli, 2021-12-07 The Aesop's Fable Paradigm is a collection of essays that explore the cutting edge intersection of Folklore and Science From moralizing fables to fantastic folktales humans have been telling stories about animals animals who can talk feel think and make moral judgments just as we do for a very long time In contrast scientific studies of the mental lives of animals have professed to be investigating the nature of animal minds slowly cautiously objectively with no room for fanciful tales fables or myths But recently these folkloric and scientific traditions have merged in an unexpected and shocking way scientists have attempted to prove that at least some animal fables are actually true These interdisciplinary chapters examine how science has targeted the well known Aesop's fable The Crow and the Pitcher as their starting point

They explore the ever growing set of experimental studies which purport to prove that crows possess an understanding of higher order concepts like weight mass and even Archimedes insight about the physics of water displacement The Aesop s Fable Paradigm explores how these scientific studies are doomed to accomplish little more than to mirror anthropomorphic representations of animals in human folklore and reveal that the problem of folkloric projection extends far beyond the Aesop s Fable Paradigm into every nook and cranny of research on animal cognition

TIME the Science of Memory The Editors of TIME,2018-12-21 The editors of TIME Magazine present The Science of Memory *Superlative* MATTHEW D. LAPLANTE,2019-04-30 2019 Foreword Indie Silver Award Winner for Science Welcome to the biggest fastest deadliest science book you ll ever read The world s largest land mammal could help us end cancer The fastest bird is showing us how to solve a century old engineering mystery The oldest tree is giving us insights into climate change The loudest whale is offering clues about the impact of solar storms For a long time scientists ignored superlative life forms as outliers Increasingly though researchers are coming to see great value in studying plants and animals that exist on the outermost edges of the bell curve As it turns out there s a lot of value in paying close attention to the oddballs nature has to offer Go for a swim with a ghost shark the slowest evolving creature known to humankind which is teaching us new ways to think about immunity Get to know the axolotl which has the longest known genome and may hold the secret to cellular regeneration Learn about Monorhaphis chuni the oldest discovered animal which is providing insights into the connection between our terrestrial and aquatic worlds Superlative is the story of extreme evolution and what we can learn from it about ourselves our planet and the cosmos It s a tale of crazy fast cheetahs and super strong beetles of microbacteria and enormous plants of whip smart dolphins and killer snakes This book will inspire you to change the way you think about the world and your relationship to everything in it

Thinking with Animals Lorraine Daston,Gregg Mitman,2005 From Victorian vivisectionists to elephant conservation from ancient Indian mythology to pet ownership in the contemporary United States our understanding of both animals and what it means to be human has been shaped by anthropomorphic thinking The contributors to Thinking with Animals explore the how and why of anthropomorphism drawing attention to its rich and varied uses Prominent scholars in the fields of anthropology ethology history and philosophy as well as filmmakers and photographers take a closer look at how deeply and broadly ways of imagining animals have transformed humans and animals alike

The Exploitation of Mammal Populations V.J. Taylor,N. Dunstone,2012-12-06 Human exploitation of other mammals has passed through three historical phases distinct in their ecological significance though overlapping in time Initially Homo sapiens was a predator particularly of herbivores but also of fur bearing predators From about 11 000 years ago goats and sheep were domesticated in the Middle East rapidly replacing gazelles and other game as the principal source of meat The principal crops including wheat and barley were taken into agriculture at about the same time and the resulting Neolithic farming culture spread slowly from there over the subsequent 10 500 years In a few places such as Mexico Peru

and China this Middle Eastern culture met and merged with agricultural traditions that had made a similar but independent transition. These agricultural traditions provided the essential support for the industrial revolution and for a third phase of industrial exploitation of mammals. In this chapter these themes are drawn out and their ecological significance is investigated. Some of the impacts of humans on other mammals require consideration on a world wide basis but the chapter concentrates parochially on Great Britain. What have been the ecological consequences of our exploitation of other mammals?

2.2 HISTORICAL PHASES OF EXPLOITATION
2.2.1 Predatory man
Our nearest relatives chimpanzees, orang utans and gorillas are essentially forest species deriving most of their diet from the fruits of forest trees and the shoots and leaves of plants. *The Last Elephants*, 2019-04-09. Amazing photographs of elephants accompany narratives from researchers, scientists and conservationists celebrating elephants and calling for their preservation. African savanna elephants among the most magnificent and beloved of our fellow mammals are an extraordinary social and intelligent species. *The Last Elephants* an homage to these animals and a clarion call for their preservation is based upon a shocking finding: savanna elephant populations across Africa are being decimated with two to three murdered every hour for their ivory. Without action these elephants soon will vanish from our world. They are a species in imminent danger of extinction and it is up to us to save them. Featuring more than 250 full color photos of the breathtaking animals by some of the world's top wildlife photographers, *The Last Elephants* was inspired by the devastating results of the continent wide Great Elephant Census of 2016 undertaken by Elephants without Borders in tandem with the world's most prominent conservation groups. The book joins together the voices and vision of scientists, lawmakers, rangers, conservationists and on the ground researchers to speak out against elephant killings, to close loopholes in international law that allow the ivory trade to continue and to pay tribute to the thousands who work to protect the animals, including African communities who have elected to preserve and protect their elephant neighbors. Offering both profiles of preservation plans that work and hope for elephants' future, this is a must read for everyone concerned for the future of one of Earth's most captivating species. **Our Wild Calling** Richard

Louv, 2020-11-10. A book that offers hope. *The New York Times Book Review*. A wondrous tapestry. Carl Safina, author of *Beyond Words: What Animals Think and Feel*, Audubon Medal winner. Richard Louv's landmark book *Last Child in the Woods* inspired an international movement to connect children and nature. Now he redefines the future of human-animal coexistence. In *Our Wild Calling*, Louv interviews researchers, theologians, wildlife experts, indigenous healers, psychologists and others to show how people are connecting with animals in ancient and new ways and how this serves as an antidote to the growing epidemic of human loneliness: how dogs can teach children ethical behavior; how animal-assisted therapy may yet transform the mental health field; and what role the human-animal relationship plays in our spiritual health. He reports on wildlife relocation and on how the growing populations of wild species in urban areas are blurring the lines between domestic and wild animals. *Our Wild Calling* makes the case for protecting, promoting and creating a sustainable and shared habitat for all.

creatures not out of fear but out of love Includes a new interview with the author discussion questions and a resource guide

The Evolution of Emotional Communication Eckart Altenmüller, Sabine Schmidt, Elke Zimmermann, 2013-01-24 Why do we think that we can understand animal voices such as the aggressive barking of a pet dog and the longing meows of the family cat Why do we think of deep voices as dominant and high voices as submissive Are there universal principles governing our own communication system Can we even see how close animals are related to us by constructing an evolutionary tree based on similarities and dissimilarities in acoustic signaling Research on the role of emotions in acoustic communication and its evolution has often been neglected despite its obvious role in our daily life When we infect others with our laugh soothe a crying baby with a lullaby or get goose bumps listening to classical music we are barely aware of the complex processes upon which this behavior is based It is not facial expressions or body language that are affecting us but sound They are present in music and speech as emotional prosody and allow us to communicate not only verbally but also emotionally This groundbreaking book presents a thorough exploration into how acoustically conveyed emotions are generated and processed in both animals and man It is the first volume to bridge the gap between research in the acoustic communication of emotions in humans with those in animals using a comparative approach With the communication of emotions being an important research topic for a range of scientific fields this book is valuable for those in the fields of animal behaviour anthropology evolutionary biology human psychology linguistics musicology and neurology

Contemporary Buddhist Ethics Damien Keown, 2013-01-11 This innovative volume brings together the views of leading scholars on a range of controversial subjects including human rights animal rights ecology abortion euthanasia and contemporary business practice

If you ally need such a referred **Elephant Memories** ebook that will present you worth, acquire the no question best seller from us currently from several preferred authors.
