Six essays written by historians and focused on particular historical periods examine the extensive range of girls' literacies in both educational and extracurricular settings. Girls from various ethnic and racial backgrounds, social classes, religions, and geographic areas of the nation are included. A host of primary documents, including such items as an 18th-century hornbook, excerpts from girls' conversations in Internet chat rooms, allow readers an opportunity to evaluate for themselves some of the materials mentioned in the volume's opening essays. And finally, an extensive bibliography will be invaluable to students expected to conduct more extensive primary research.
