

The background of the book cover is a textured, warm-toned surface, possibly a piece of aged paper or a painting. It features a dark, silhouetted branch with several leaves extending from the upper left towards the center. On the right side, there is a soft, painterly depiction of a human hand, with fingers slightly curled, appearing to reach towards the branch. Ecology Of Everyday Life Rethinking The Desire Of Nature:

Ecology of Everyday Life Chaia Heller, 1999 Ecology of Everyday Life examines the ecological impulse as a desire for nature a desire that emerges as people within industrial capitalist contexts respond to the personal and aesthetic rather than the physical and political implications of ecological breakdown While exploring the historical causes of this romantic desire for nature Heller also offers a way to reconstruct ideas of both nature and desire drawing from feminist anarchist and social ecological theory She provides an activist response to ecological questions arguing that the ecology movement too often links ecological problems to personal psychological and spiritual concerns rather than to concerns of social justice Yet rather than dismiss such personal and qualitative concerns Heller links the desire for a more meaningful and integral quality of life to the activist impulse itself Questioning assumptions about nature desire and the ecological agenda the author encourages readers to consider new ways of desiring nature that entail changes not only in personal life style and outlook but changes in social institutions as well Chaia Heller holds a MA in psychology and has worked for many years as a clinical social worker counselling and advocating for women struggling with issues of domestic abuse and poverty In addition she has had a long career as a teacher and international lecturer in the fields of social ecology and ecofeminism and is currently on the faculty at the Institute for Social Ecology She also teaches at the University of Massachusetts where she is pursuing a PhD

William Wordsworth and the Ecology of Authorship Scott Hess, 2012-04-12 In William Wordsworth and the Ecology of Authorship Scott Hess explores Wordsworth's defining role in establishing what he designates as the ecology of authorship a primarily middle class nineteenth century conception of nature associated with aesthetics high culture individualism and nation Instead of viewing Wordsworth as an early ecologist Hess places him within a context that is largely cultural and aesthetic The supposedly universal Wordsworthian vision of nature Hess argues was in this sense specifically male middle class professional and culturally elite factors that continue to shape the environmental movement today

The American Adrenaline Narrative Kristin J. Jacobson, 2020-06-01 The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales their gendered biases and how they simultaneously promote and hinder ecological sustainability To explore these themes Kristin J Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970 a time frame selected as a watershed moment for the contemporary American environmental movement The forty plus years since that day also mark the rise in the popularity and marketing of many things as extreme including sports jobs travel beverages gum makeovers laundry detergent and even the environmental movement itself Jacobson maps the American eco imagination via adrenaline narratives grounding them in the traditional literary practice of close reading analysis and in ecofeminism She surveys a range of popular and lesser known primary texts by American authors including best selling books such as Jon Krakauer s Into Thin Air and Aron Ralston s Between a Rock and a Hard Place and lesser known texts such as Patricia C McCairen s Canyon Solitude Eddy L Harris s Mississippi Solo and Stacy Allison s Beyond the Limits She also discusses such narratives as they appear in print and online articles and magazines feature length and short films television shows amateur videos social networking site posts fiction advertising and

blogs Jacobson contends that these stories constitute a distinctive genre because unlike traditional nature travel and sports writing adrenaline narratives sustain heightened risk or the element of the extreme within a natural setting Additionally these narratives provide important insight into the American environmental imagination's connection to masculinity and adventure knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention
