Economic Mind In American Civilization 1918-1933 Volumes Four And Five:

The Economic Mind in American Civilization: 1918-1933 Joseph Dorfman, 1969 **The Economist's Oath** George F. DeMartino, 2011-01-26 Economics is today among the most influential of all professions. Economists alter the course of economic affairs and deeply affect the lives of current and future generations. Yet virtually alone among the major professions, economics lacks a body of professional ethics to guide its practitioners. Over the past century, the profession consistently has refused to adopt or even explore professional economic ethics. As a consequence, economists are largely unprepared for the ethical challenges they face in their work. *The Economist's Oath* challenges the economic orthodoxy. It builds the case for professional economic ethics, step by step, first by rebutting economists' arguments against and then by building an escalating positive case for professional economic ethics. The book surveys what economists do and demonstrates that their work is ethically fraught. It explores the principles, questions, and debates that inform professional ethics in other fields and identifies the lessons that economics can take from the best established bodies of professional ethics. George DeMartino demonstrates that in the absence of professional ethics, well-meaning economists have committed basic preventable ethical errors that have caused severe harm for societies across the globe. The book investigates the reforms in economic education that would be necessary to recognize professional ethical obligations and concludes with the *Economist's Oath*, drawing on the book's central insights and highlighting the virtues that are required of the ethical economist. *The Economist's Oath* seeks to initiate a serious conversation among economists about the ethical content of their work. It examines the ethical entailments of the immense influence over the lives of others that the economics profession now enjoys and proposes a framework for the new field of professional economic ethics.

The Economic Mind in America History of Economics Society. Conference, 1998. *The Economic Mind of America* examines the concept of American economic thought, reassessment of pioneering American policy analysts such as Irving Fisher, Wesley Mitchell, Harold Moulton, and Leo Paslovsky, as well as the theoretical contributions of Herbert Davenport and Frank Knight, Thorstein Veblen's institutional economics, and an exploration of the influence of Canadian and European economic thought, analysis of contributions of C. S. Peirce, Alvin Johnson, and science fiction author Robert A. Heinlein. American economists' interests in issues from 1886-1995.

Political Economy, Linguistics and Culture Jürgen Backhaus, 2007-12-21. During the late 19th and throughout the 20th century, social sciences in general and economics in particular have undergone enormous progress. This has led to something of an embarrassment of riches. While certain topics have been fully researched to the point where the marginal benefit from further research is approaching zero, others have remained largely under-researched or were being ignored altogether. It is this discrepancy which prompted the research paradigm of *Crossing Bridges*. For this volume, ten authors have joined forces to address the problem of under-researched topics, focussing in particular on gaps in interdisciplinary research between economics and other social sciences such as linguistics, art, and cultural history. Making use of interdisciplinary methods and approaches, the book makes a case

for stronger bonds between the different fields of social science *Research in Economic History* Christopher Hanes, Susan Wolcott, 2019-08-26 In this new volume of *Research in Economic History* editors Christopher Hanes and Susan Wolcott bring together a cast of expert contributors to vigorously interrogate and analyze historic economics questions looking across the political economy of the US European history and longstanding economic debates **The Economic Mind in American Civilization** Joseph Dorfman, 1959 *The Historiography of Economics* A.W. Bob Coats, 2013-10-08 This is the third and final volume of collected papers of A W Bob Coats Coats began to collect material for this volume in the years following the publication of the second volume in 1993 but sadly died in 2007 before the work was completed The volume has now been completed under the editorship of Roger Backhouse and Bruce Caldwell Along with his articles the compilation of the volume also reflects Coats interest in and commitment to book reviews a selection of which have been chosen for inclusion The book also includes a comprehensive bibliography In addition to a preface by Backhouse and Caldwell the volume also reproduces the obituary that was published in *History of Political Economy* a memoir published in 1996 and an interview with Grant Fleming published the previous year Together the introductory materials articles and reviews serve as a fitting tribute to the body of work of Bob Coats *Annals of the American Academy of Political and Social Science* , 1963 **Research in the History of Economic Thought and Methodology** Luca Fiorito, Scott Scheall, Carlos Eduardo Suprinyak, 2023-10-02 *Research in the History of Economic Thought and Methodology* Volume 41B features a selection of papers presented at the First History of Economics Diversity Caucus Conference *On the History of Economic Thought* A.
