Uneven Real Estate Development in Romania at the Intersection of Deindustrialization and Financialization Enikő Vincze, Ioana Florea, Manuel B. Aalbers, 2024-07-19 This book examines the progression of real estate development within the deindustrialization financialization nexus It explores the roles it has in semi peripheral contexts such as Romania where it overlaps with the process of the transformation of state socialism into neoliberal capitalism viewed at the intersection of global national and local forces The book focuses on real estate development in Romania as a product and a driver of capitalism It contributes to ongoing debates in critical urban theories and Marxist perspectives in urban sociology Focusing on the under researched East European region it decenters social research and fine tunes the political economy theory about state and economic restructuring The book contains methodological and theoretical insights that are useful in other contexts

beyond Romania and Central and Eastern Europe especially in other semi peripheral emerging markets The focus of critical inquiry into capitalist transformations adopted in this book can also support political activism It uncovers the varieties of the deindustrialization financialization nexus in real estate built on the dismantled pre 1990 socialist industrial plants The chapters describe the advancement of real estate investments across second and third tier cities displaying uneven development and subordinate financialization at the intersection of local and global processes and political and economic actors It will be of interest to researchers and students of urban sociology economic sociology political economy human geography and political geography Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Demographic Change and Housing Wealth: John Doling, Marja Elsinga, 2012-08-11 Across the EU populations are shrinking and ageing An increasing burden is being placed on a smaller working population to generate the taxes required for pensions and care costs Welfare states are weakening in many countries and across Europe households are being increasingly expected to plan for their retirement and future care needs within this risky environment At the same time the proportion of people buying their own home in most countries has risen so that some two thirds of European households now own their homes Housing equity now considerably exceeds total European GDP This book discusses questions like to what extent might home ownership provide a potential cure for some of the consequences of ageing populations by realizing housing equity in order to meet the consumption needs of older people What does this mean for patterns of inheritance and longer term inequalities across Europe And to what extent are governments banking on their citizens utilising their housing wealth now and in the future

Management of Privatised Housing Vincent Gruis,Sasha Tsenkova,N. Nieboer,2009-11-09 The sale of public and social housing has been a major aspect of housing policies in recent decades Privatisation and a general retreat by governments from the housing arena have pushed up sales this has been particularly evident within Eastern European countries and China but is also taking place in many Western European countries and Australia Wherever it occurs such privatisation has lead to new challenges for housing management Many estates are now a mix of public and private raising questions about the division of responsibilities between different owners Legislation to address this is not adequate and public managers are still hampered by the bureaucratic mechanisms within their organisations while the new owners are not used to their responsibilities for maintenance Added to this are the limited financial resources for renewal and maintenance among both public and private owners at a time when the need for investments is urgent especially within the massive housing estates dating from the communist era Experts from Australia France the Netherlands UK Switzerland China the Czech Republic Moldavia Russia Serbia and Slovenia present their country s context and the policies and practice for managing privatised

housing together with case studies illustrating the issues described How privatised public housing is managed is of international concern which will benefit from an international exchange of knowledge and best practice The comparative analysis offered in Management of Privatised Housing International Policies Practice makes a significant contribution to the literature on this important topic Community Action for Collective Goods Annamária Orbán,2006 Human interaction breeds conflicts Unresolved problems provide food for social sciences in general and especially for political science a melting pot of different branches of social sciences including philosophy economics sociology psychology etc Political science tries to use all of these branches of the social sciences when examining how people as a collective try to resolve their conflicts The theory of collective action a particular field of research in political science is concerned with the question of how people behave and act in groups when pursuing their common goals and how collective action for a collective good can or cannot take place The author of this book tried to find a field of social life where collective action problems occur frequently and do not cease easily Thus the author selected Hungarian residential condominiums where people have both their private properties and share common properties and facilities The overall management of the cond

Smelser, Paul B. Baltes, 2001 The largest work ever published in the social and behavioural sciences It contains 4000 signed articles 15 million words of text 90 000 bibliographic references and 150 biographical entries *The Post-Socialist City* Kiril Stanilov, 2007-08-13 In the large body of literature produced during the last fifteen years on the transformation of Eastern European societies after the fall of communism studies investigating changes in urban form and structure have been quite rare Yet a profound reorganization of the manner in which urban space is appropriated has taken place impacting the life of over 200 million urban residents in the region The patterns of spatial organization which have been established during this fairly limited but critical timeframe are likely to set the direction of future urban development in CEE cities for a long time This book focuses on the spatial transformations in the most dynamically evolving urban areas of post socialist Central and Eastern Europe linking the restructuring of the built environment with the underlying processes and forces of socio economic reforms We hope that the detailed accounts of the spatial transformations in a key moment of urban history in the region will enhance our understanding of the linkages between society and space adding to the knowledge that is needed for resolving the difficult challenges facing cities throughout the globe in the beginning of the twenty first century *Environment & Planning*, 2001
