José Luis Iparraguirre

Economics Of Individual And Population Aging:

The Economics of Individual and Population Aging Robert L. Clark, Joseph J. Spengler, 1980-04-30 This study aims to identify and describe the principle economic issues associated with individual and population ageing In addition the study surveys and assess the existing knowledge including research by scholars of many countries and different fields in the social sciences of the economic and social problems associated with ageing Although the study covers a wide range of issues it focuses primarily on the economic complexities of individual ageing and the macro economic problems that arise from age structure changes in the population The authors giving examples from many countries trace the development of concern for population ageing and examine theoretical concepts and changing demographic conditions Cross national econometric studies are cited along with time series and cross sectional research on individual countries In assessing the state of the literature on the economic problems of ageing the authors have attempted to indicate fruitful avenues for further research

Economics and Ageing José Luis Iparraguirre, 2018-12-05 This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing Placing economic considerations into a wider social sciences context this is ideal reading not only for advanced undergraduate and masters students in economics health economics and the economics of ageing but also policy makers students professionals and practitioners in gerontology sociology health related sciences and social care This volume discusses the fiscal implications of ageing health economics and long term care Fiscal policy issues include generational accounting and national transfer accounts the relationship between ageing public expenditure and fiscal policy the age profiles of public expenditures and taxes and the relationship between ageing capital and labour taxation Health economics with regard to ageing comprises healthy and disability free life expectancy the relationship between health inequalities and age the macroeconomic implications of population health the socio economic determinants of health the interaction between ageing and both individual and aggregate health expenditure and economic approaches to valuing later life This volume closes with an exposition of the economics of formal and informal care as well as questions around insurance risk and the so called sandwich generation

Handbook of the Economics of Population Aging John Piggott, Alan Woodland, 2016-12-01 Handbook of the Economics of Population Aging Volume 1B provides the economic literature on aging and associated subjects presenting comprehensive portraits of both social and theoretical issues As the second of two volumes in this series on the economics of population aging it continues the discussion delving deeper into topics such as the labor market and human resource issues gerontology history and the sociological and political ramifications of this fascinating topic whose inception dates back to the late 1970 s This volume includes literature that has appeared in general economics journals in various field journals in economics especially but not exclusively those covering labor market and human resource issues information from interdisciplinary social science and life science journals and data presented in papers by economists published in journals associated with gerontology history sociology political science and

demography amongst others Presents comprehensive portraits of social and theoretical issues that can be used by both policymakers and scholars Readers receive diverse perspectives on subjects that can be closely associated with national and regional concerns Chapters offer comprehensive critical reviews and expositions on the essential aspects of the economics of population aging

Population Aging and the Generational Economy Ronald Demos Lee, Andrew Mason, 2011-01-01 While there already exists a crowded body of publications addressing the effect of an aging population on the economy this monograph is most outstanding in presenting a global in depth analysis of the implications thereby generated for 23 developed and developing countries Scholars researchers and practitioners everywhere will benefit immensely from this comprehensive work

H I Liebling Choice Ron Lee and Andrew Mason s *Population Aging and the Generational Economy* is a demographic and economic tour de force Their collaborative intercontinental study of aging consumption labor supply saving and private and public transfers is the place to go to understand global aging and its myriad and significant economic challenges and opportunities Laurence Kotlikoff Boston University US The culmination of work by Lee Mason and their collaborators from around the world to extend Samuelson s framework to accommodate realistic demography empirical measurement of age specific earnings consumption tax payments and benefit receipts the studies demonstrate the power of this integrated economic demographic framework to advance our understanding of critical public policy challenges faced by countries at different stages of demographic transition and population aging Robert Willis University of Michigan US Lee and Mason have done scholars and practitioners a magnificent service by undertaking this comprehensive compelling and supremely innovative examination of the economic consequences of changes in population age structure The book is a bona fide crystal ball It will be a MUST READ for the next decade David Bloom Harvard School of Public Health US

Population Aging and the Generational Economy provides an encompassing account of what we know about population aging and the impact that this process will have on our economies It does not confine itself to the advanced industrial countries where aging has already been largely studied but adopts a truly global perspective I am sure it will become a key reference for researchers students and those involved in policy making in areas that are affected by population aging Giuliano Bonoli Swiss Graduate School of Public Administration IDHEAP Switzerland Over coming decades changes in population age structure will have profound implications for the macroeconomy influencing economic growth generational equity human capital saving and investment and the sustainability of public and private transfer systems How the future unfolds will depend on key actors in the generational economy governments families financial institutions and others This path breaking book provides a comprehensive analysis of the macroeconomic effects of changes in population age structure across the globe The result of a substantial seven year research project involving over 50 economists and demographers from Africa Asia Europe Latin America and the United States the book draws on a new and comprehensive conceptual framework National Transfer Accounts to quantify the economic lifecycle and economic flows across generations It presents comprehensive estimates of

both public and private economic flows between generations and emphasizes the global nature of changes in population age structure that are affecting rich and poor countries alike This unique and informative book will prove an invaluable reference tool for a wide ranging audience encompassing students researchers and academics in fields such as demography aging public finance economic development macroeconomics gerontology and national income accounting for policy makers and advisers focusing on areas of the public sector such as education health pensions other social security programs tax policy and public debt and for policy analysts at international agencies such as the World Bank the IMF and the UN Economics and Ageing José Luis Iparraguirre,2018-12-20 This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing Placing economic considerations into a wider social sciences context this is ideal reading not only for advanced undergraduate and masters students in economics health economics and the economics of ageing but also policy makers students professionals and practitioners in gerontology sociology health related sciences and social care This volume introduces the different conceptualisations of age and definitions of old age as well as the main theories of individual ageing as developed in the disciplines of biology psychology and sociology It covers the economic theories of fertility mortality and migration and describes the four main frameworks that can be used to study economics and ageing namely the life cycle the overlapping generations the perpetual youth and the dynastic models **The Routledge Handbook of the Economics of Ageing** David E. Bloom,Alfonso Sousa-Poza,Uwe Sunde,2023-08-16 Ageing populations pose some of the foremost global challenges of this century Drawing on an international pool of scholars this cutting edge Handbook surveys the micro macro and institutional aspects of the economics of ageing Structured in seven parts the volume addresses a broad range of themes including health economics labour economics pensions and social security generational accounting wealth inequality and regional perspectives Each chapter combines a succinct overview of the state of current research with a sketch of a promising future research agenda This Handbook will be an essential resource for advanced students researchers and policymakers looking at the economics of ageing across the disciplines of economics demography public policy public health and beyond Chapter 37 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license Economics and Ageing José Luis Iparraguirre,2020-01-29 This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing Placing economic considerations into a wider social sciences context this is ideal reading not only for advanced undergraduate and masters students in health economics and economics of ageing but policy makers professionals and practitioners in gerontology sociology health related sciences and social care This volume introduces topics in the economics of happiness quality of life and well being in later life It also covers questions of inequality and poverty intergenerational economics and housing Other areas described in this book include behavioural economics political economy and consumption in ageing societies *Social Economics* John Eatwell,Murray Milgate,Peter Newman,1989-03-01

This is an excerpt from the 4 volume dictionary of economics a reference book which aims to define the subject of economics today 1300 subject entries in the complete work cover the broad themes of economic theory This extract concentrates on social economics **An Aging World** Barbara Boyle Torrey, Kevin G. Kinsella, Cynthia Murray Taeuber, 1987

Population Aging, Fertility and Social Security Akira Yakita, 2017-02-06 This book provides a comprehensive theory based analysis of current issues in population economics It addresses the most important problems caused by demographic changes using the popular overlapping generations growth model by Samuelson and Diamond Taking into account families fertility decisions it examines not only the demographic changes due to longer life expectancy but also the effects of social security policy on demography and labor supply individual retirement behaviors Conducting all analyses in a dynamic general equilibrium setting the book offers a valuable theoretical reference guide in the field of population economics
