

Development Economics

[di-'ve-ləp-mənt ,e-kə-'nä-miks]

A branch of economics focused on improving fiscal, economic, and social conditions in developing countries.

Economy And Development

Albert O. Hirschman

Economy And Development:

The Conversation of Economic Development Wilfred L. David, 1997 This book investigates the belief patterns that underly alternative perspectives of development thought and policy It discusses the differing theories and models of development in a discursive manner to highlight the importance of interaction between academic discourse and everyday life experiences Utilizing insights drawn from the history of ideas economic history philosophy and political economy the author shows how the field of development economics has evolved

Development Economics HL Ahuja, A result of more than four decades of teaching experience this book deals with the problems of economic growth development and eradication of poverty and unemployment The book also includes an analytical study of important issues of environment and sustainable development The book not only explains the models and theories of economic growth but also critically evaluates their relevance to developing countries A major highlight of discussion in the context is the exploration of the widely accepted Amartya Sen s Capability Approach to development

Economic Development Marcelo M. Giugale, 2013-12-06 There is much discussion about global poverty and the billions of people living with almost nothing Why is it that governments development banks think tanks academics NGOs and many others can t just fix the problem Why is it that seemingly obvious reforms never happen Why are prosperity and equity so elusive *Economic Development What Everyone Needs to Know* brings readers right into the trenches of economic development to show what practitioners are actually doing and explains the issues dilemmas options frustrations and opportunities they face day in and day out In straightforward language and a question and answer format Marcelo M Giugale outlines the frontier of the development practice or as he puts it the point at which knowledge stops and ignorance begins He takes readers from why it is so difficult to get governments to function to the basic policies that economies need to work well the powerful new tools for social assistance and the challenges of inclusion education health infrastructure technology data and foreign aid The book draws examples from the world over but pays particular attention to the region that represents development and the need for it better than any other Africa Giugale gives no definitive universal answers They don t really exist Rather he highlights what works what doesn t and what s promising But his overall message is clear economic development and the poverty reduction that goes with it have never been more possible for more countries What Everyone Needs to Know is a registered trademark of Oxford University Press

The Pioneers of Development Economics Jomo Kwame Sundaram, 2005-09 A survey of the main influences on the development of modern development economics

Economic Development Michael P. Todaro, 1994

The Science of Economic Development and Growth: The Theory of Factor Proportions C.C. Onyemelukwe, 2016-07-08 A theoretical framework aiming to facilitate study of development economics The author presents his theory in three sections how advanced nations developed a proposed third dimension in addition to labour and capital and why capital accumulation is unnecessary even potentially harmful

Development Economics Gérard Roland, 2016-05-23 Gerard Roland s new text Development

Economics is the first undergraduate text to recognize the role of institutions in understanding development and growth Through a series of chapters devoted to specific sets of institutions Roland examines the effects of institutions on growth property rights market development and the delivery of public goods and services and focuses With the most comprehensive and up to date treatment of institutions on development Roland explores the important questions of why some countries develop faster than others and why some fail while others are successful

Economic Policy for Growth Salim Rashid,2000-05-31 Economic Development is but one facet of Human Development This forces us to ask how do humans develop Man is a social animal and the growth of our humanity requires various social institutions such as bureaucracy The paradox of capitalism is that it is a system ostensibly based on self interest yet wholly dependent on non market values for its success These non market values are shaped by two much neglected factors religion and ethnicity Economic Development is an applied field whatever it claims as a conclusion should be an applicable conclusion This requires attention to all those non economic factors which translate economic decisions into practice such as the forces of nationalism versus the pressures of such global powers as US foreign policy and the advice of the IMF IBRD Since policy is our goal theory whose intellectual basis is inaccessible to policy makers or which fails to have application should be minimized Mathematical models are best avoided and if they are to be used the burden of proof must be placed upon their proponents As insights about the market are limited neither by time nor space poor countries can learn from rich ones and vice versa It is most fruitful to focus on examples of success such as the East Asian economies They are the clearest illustration of the fact that rapid economic development is possible even to those who have suffered through imperialism and possess few natural resources but have their work and their determination intact One good example is enough

Some Aspects of Economic Development William Arthur Lewis,1969 SCOTT Copy 1 From the John Holmes Library Collection

Economic Development and Environmental Sustainability Ramón López,Michael A. Toman,2006 Publisher description
