Information Seeking in Electronic Environments Gary Marchionini, 1995 Significant amounts of our time and energy are devoted to creating managing and avoiding information Computers and telecommunications technology have extended our regard for information and are driving changes in how we learn work and play One result of these developments is that skills and strategies for storing and retrieving information have become more essential and more pervasive in our culture This book considers how electronic technologies have changed these skills and strategies and augmented the fundamental human activity of information seeking The author makes a case for creating new interface designs that allow the information seeker to choose what strategy to apply according to their immediate needs Such systems may be designed by providing information seekers with alternative interface mechanisms for displaying and manipulating multiple levels of representation for information objects Information Seeking in Electronic Environments is essential reading for researchers and graduate students in information science human computer interaction and education as well as for designers of information retrieval systems and interfaces for digital libraries and archives

Environmental Testing Techniques for Electronics and Materials Geoffrey W. A. Dummer, Norman B. Griffin, 2013-10-22 Environmental Testing Techniques for Electronics and Materials reviews environmental testing techniques for evaluating the performance of electronic equipment components and materials Environmental test planning test methods and instrumentation are described along with the general environmental conditions under which equipment must operate This book is comprised of 15 chapters and begins by explaining why environmental testing is necessary and describing the environment in which electronics must operate The next chapter considers how an environmental test plan is designed the methods for the environmental testing of components and materials instrumentation and control of test chambers shock and vibration test instrumentation and requirements for specification writing The reader is then introduced to factors that might affect the reliability of equipment including high humidity environment galvanic corrosion problems high and low temperature environments mechanical and associated hazards transport hazards and long term storage Problems posed by high altitude and space environments nuclear radiation and acoustic noise are also discussed The final chapter is devoted to environmental protection techniques and looks at the effects of climatic environments on radio interference as well as the effects of the environment on the human operator This

monograph will be of value to materials scientists and electronics engineers as well as those engaged in the design development and production of professional and military equipment

Emerging Issues in the Electronic Environment

Jeannie P Miller, 2013-04-15 Explore the issues that are changing user librarian interactions in today's evolving electronic libraries This book examines the rapid advances in technology and scientific discovery that have changed the way sci tech library users seek information changes which have also necessitated increasingly high levels of skill in information technology and advanced subject knowledge from librarians From negotiating the intricacies of working with e journals to simplifying the data collection process anyone involved in allocating library resources or prioritizing research agendas will find relevant useful information here as will those involved in library education

Emerging Issues in the Electronic Environment Challenges for Librarians and Researchers in the Sciences begins with **Scientific Communication New Roles and New Players** a detailed examination of the evolution of the information seeking behavior of scientists from the days of print based resources to today's electronic media Next you'll find techniques designed to maximize the ability of scientists to make lucky connections in their electronic search for information in **Too Important to be Left to Chance Serendipity and the Digital Library** Four chapters in **Emerging Issues in the Electronic Environment** bring you up to date information on various aspects of working with e journals **For Better or Worse The Joys and Woes of E Journals** investigates the impact of electronic only journal holdings on collection development decisions and the accompanying issues of archiving economics content and research use **Scan It and They Will Come But Will They Cite It** provides citation data on the usefulness and impact of retrospective digitization projects for journal contents **The Use of Online Supplementary Material in High Impact Scientific Journals** raises vital questions as to whether the print or electronic article should be regarded as the primary archival resource **Challenges and Opportunities for Bibliometrics in the Electronic Environment The Case of the Proceedings of the Oklahoma Academy of Science** investigates how issues of access copyright and fair use as well as differences among online file formats may impact bibliometric analysis Two chapters in **Emerging Issues in the Electronic Environment** are designed to help simplify the data collection process **Information Overload Keeping Current Without Being Overwhelmed** will show you how to identify needed sources by using current awareness services and e mail filtering technologies **The Impact of Electronic Bibliographic Databases and Electronic Journal Articles on the Scholar's Information Seeking Behavior and Personal Collection of Reprints** reviews organizational methods for managing large collections of electronic articles In addition this forward thinking book contains four chapters that point out possible avenues for increased librarian facilitated service to users **Biology Databases for the New Life Sciences** discusses the new sequence microarray and protein structure databases the emergence of bioinformatics and the opportunities available to librarians in this developing area **Map and Spatial Data Acquisitions in the Electronic Age** shows how the traditionally complicated and time consuming process of acquiring cartographic information can be simplified by efficient use of the Internet **Webinar Technology Applications in Libraries** reviews the operation

application and features of Webinars and compares this technology with Web tutorials virtual reference and courseware management systems videoconferencing and Webcasting Preserving Digital Librari **Electronic Resources in the Virtual Learning Environment** Jane Secker,2004-10-31 This book covers the key current topic of electronic library resources and learning in the digital age The book begins by outlining the changing information environment in which librarians now work It then goes on to discuss the development of e learning as a concept and the impact this is having on the further and higher education sector the changing role of the librarian in supporting online learning the technical problems associated with connecting up library systems the copyright and licensing of electronic resources in a digital environment and finally the book offers tips for librarians when becoming involved in such initiatives Examines the wealth of electronic library resources Examines the development of e learning online learning Considers the role of the librarian in supporting e learning online learning **Building University Electronic Educational Environments** Stephen D. Franklin, Ellen Strenski, 2013-03-14 The Internet and the World Wide Web are deeply affecting the way things are traditionally done E commerce is changing businesses the stock market is accessible to individuals digitized journals up to date databases and newsgroups are changing the lives of researchers Is it reasonable to think that learning will remain unaffected Nevertheless universities with their blend of teaching and research have much to offer to those who wish to learn more than simple skills judgment initiative and fair competition for research positions Over the years universities have acquired invaluable resources in the form of laboratories and libraries with specially trained staff How can they evolve to take advantage of the many possibilities of the Internet and broadband communication Many institutions of higher education are trying to integrate new information and communications technologies into current curricula or to develop new learning paradigms for learning Because it is still so early in the game they are eager to compare their efforts and results to the achievements of others and are willing to learn from them The International Federation for Information Processing IFIP is a multi national federation of professional and technical organizations founded in 1960 under the auspices of UNESCO whose mission is to assist in the development exploitation and application of Information Technology for the benefit of all peoples Given this scope of activity IFIP seemed the appropriate body to give an international dimension to such a forum
