ELEMENTARY STATISTICAL METHODS George Barrie Wetherill, 1975 **Elementary Statistical Methods** G. Barrie Wetherill, 1972 This book is mainly based on lectures given by Professor D R Cox and myself at Birkbeck College over a period of eight to nine years It began as a joint venture but pressure of other work made it necessary for Professor Cox to withdraw early on I have throughout received much valuable advice and encouragement from Professor Cox but of course I am solely responsible for the text and any errors remaining in it The book is intended as a first course on statistical methods and there is a liberal supply of exercises Although the mathematical level of the book is low I have tried to explain carefully the logical reasoning behind the use of the methods discussed Some of the exercises which require more difficult mathematics are marked with an asterisk and these may be omitted In this way I hope that the book will satisfy the needs for a course on statistical methods at a range of mathematical levels It is essential for the reader to work through the numerical exercises for only in this way can he grasp the full meaning and usefulness of the statistical techniques and gain practice in the interpretation of the results Chapters 7 and 8 discuss methods appropriate for use on ranked or discrete data and Chapters 9 12 do not depend on these chapters Chapters 7 and 8 may therefore be omitted if desired Elementary Statistics for Geographers James E.
