SpencerWood,2013-06-29 Historical archaeology has made great strides during the last two decades Early archaeological reports were dominated by descriptions of features and artifacts while research on artifacts was concentrated on studies of topology technology and chronology Site reports from the 1960s and 1970s commonly expressed faith in the potential artifacts had for aiding in the identifying socioeconomic status

differences and for understanding the relationships between the social classes in terms of their material culture. An emphasis was placed on the presence or absence of porcelain or teaware as an indication of social status. These were typical features in site reports written just a few years ago. During this same period advances were being made in the study of food bone as archaeologists moved away from bone counts to minimal animal counts and then on to the costs of various cuts of meat. Within the last five years our ability to address questions of the relationship between material culture and socioeconomic status has greatly expanded. The essays in this volume present efforts toward measuring expenditure and consumption patterns represented by commonly recovered artifacts and food bone. These patterns of consumption are examined in conjunction with evidence from documentary sources that provide information on occupations, wealth levels, and ethnic affiliations of those that did the consuming. One of the refreshing aspects of these papers is that the authors are not afraid of documents and their use of them is not limited to a role of confirmation.

**Images of the Recent Past** Charles E. Orser Jr., 1996-08-15

Historical archaeology has been without a definitive up to date collection that reflects the breadth of the field until now. Orser's book brings together classic and contemporary articles that demonstrate the development of the field over the last twenty years both in North America and throughout the world. Orser's selections represent a wide variety of locales and perspectives and include works by many of the leading figures in the field. Engaging articles make it accessible to any interested reader and superb for historical archaeology classes.
