It reveals the unique characteristics of Chinese MWEs by examining their core attributes, identification and classification, and knowledge framework. It also assesses for the first time the distribution and density of Chinese MWEs in textbooks. By doing so, the book provides important insights into Chinese language learning with implications for natural language processing, lexicography and psychology. Moreover, it offers a framework for linguists, language teachers and learners, computer scientists, lexicographers and psychologists to explore their own areas of interest. [The Field of Chinese Language Education in the U.S.](#) Vivian Ling, 2018-02-13 This book will be the first account of the development of Chinese as a foreign language in the U.S. as it interacts with the relevant entities in China and beyond. There are virtually no systematic retrospective reflections on the field outside of the greater China region and yet

over the past decades the field has grown by leaps and bounds and it is critical now that we pause to reflect on what has happened and what we can learn from the past The contributors are among some of the most influential pioneers in the field whose entire academic lives have been dedicated to its development The Field of Chinese Language Education in the U S A Retrospective of the 20th Century is aimed at those who are currently engaged in Chinese language education as teachers or as students
