**A Graduated Course of Elementary Problems in Practical Plane Geometry ...** John Lowres, 1870      Text-book of Elementary Plane Geometry Julius Petersen, 1880      **Elementary Plane Geometry Inductive and Deductive** Alfred Baker, 2015-06-25 Excerpt from Elementary Plane Geometry Inductive and Deductive The geometry of Euclid is deductive Yet the processes of all sciences other than pure mathematics involve both induction and deduction All the knowledge which we have of life with its varied phenomena is reached by induction and deduction Any science then which permits the student from a number of observations to reach a general result and again from such generalization to draw conclusions must have distinct educational value The present little book is an attempt to make the processes of elementary geometry both inductive and deductive I feel that in making this attempt I am adapting the study of Geometry to immature minds The mind of youth receives its knowledge in the form of isolated facts it is for the educator to point out that isolated facts fall into groups and may be crystallized into general conclusions Special opportunities present themselves in elementary geometry for following this method Thus if a number of triangles be accurately constructed with bases of 45 millimetres and angles at the bases 75

and 62 by actual measurement the learner finds that all the sides opposite to the angles of 75 are equal and likewise those opposite to the angles of 62 and that the remaining angles of the triangles have the same magnitude Analogous constructions and measurements being repeated in a number of cases the learner as a matter of inductive observation feels himself justified in making the generalization expressed in the enunciation of Euclid I 26 In the process the intellectual interest and curiosity of the pupil are excited and in reaching the conclusion he feels almost as if he had made the discovery himself If subsequently geometrical forms are presented to him where he can utilize his previous conclusion he feels with keenness the value of his previous work He has in fact been going through the process of induction and deduction the process through which every scientific discoverer goes with in miniature the emotions of the investigator About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
