Getting Started with MuPAD Mirosław Majewski, 2006-01-19 No book is born in a vacuum There must always be somebody who needs the book somebody who will read and use it and somebody who will write it I walked with the idea of this book for a long time However its final concept came into reality during my lectures in February 2005 at the Universiti Malaysia Sabah in Borneo I realized that my students needed a bit more than just my lectures They needed a text that they could follow during lab sessions or after classes so they could learn at any time at their own pace Therefore I decided to write a small book with just a few chapters covering the different areas of applying the Computer Algebra System called MuPAD in different areas of mathematics I intended each chapter to be short enough to be covered in a reasonably short time about 2 to 4 hours Another important objective was to have each chapter completely independent of the others so that the readers could easily select and read the chapters that they needed the most without being forced to read the whole book There was one obstacle for such a concept the large number of graphics I used to visualize mathematics Therefore I finally decided to write a separate chapter covering the major concepts of MuPAD graphics The graphics chapter together with the introductory chapter forms the base for all the remaining chapters
