The global economy politics and society are all undergoing rapid transformations Therefore we may expect no letup in activity over the next decade The definitions of both teaching and learning have evolved along with the school system and the world beyond its walls The dynamic between educator and student is more intricate and demanding now than ever before This expanded conception of the teacher's function has prompted a rethinking of the traditional methods of teaching educators That's why we think of teacher education as an ongoing cycle that starts with pre-service preparation and continues throughout the teacher's career with periodic and sustained in-service sessions Educators must have the mindset that they are still students during their tenure There are four main focuses in teacher training programs enhancing the general education of trainee teachers developing their subject matter expertise learning more about pedagogy and how children learn and gaining experience in the classroom There is a broad range of equilibrium between these four components Educational institutions serve a crucial purpose by giving students opportunities to move from ignorance to understanding in which teachers play a crucial role Teachers have a pivotal role as the institution's primary staff in bringing about this change Every educational program relies heavily on its teachers At every point in time the responsibility of ensuring that the educational process is carried out is on the instructor Curriculum and Instructional Methods for the Elementary School Johanna Kasin Lemlech, 1990-01-01 Physical Education Methods for Elementary Teachers Katherine T.
