Going Global Amy Hodges, Leslie Seawright, 2014-09-26 While English has become the lingua franca in science business and other fields scholars still grapple with the implications of its adoption in many other settings and cultures To what extent should English be introduced and taught in schools around the world Who owns the English language and can therefore shape its structure and aims What are world Englishes and how can teachers demonstrate them to their students Is English the language of the oppressor an imperialist tool or does global English offer an opportunity for greater understanding and cooperation amongst peoples and cultures This volume of critical essays explores these and other questions surrounding language education and culture in the globalized world Honoring students cultures while trying to prepare them for an uncertain and constantly changing future is the resounding theme of this book The contributors to this volume are as multi cultural and multi faceted as such a volume would demand The essays include authors and studies from Algeria India Iran Ghana Germany Poland Tunisia Qatar Saudi Arabia United Kingdom the United

States of America and Yemen The perspectives offered in this volume contribute greatly to the ongoing conversations on language education and globalization **Connecticut Common School Journal** Henry Barnard,1839 **El Llenguatge Científic** Jornades Catalanes sobre Llengües per a Finalitats Específiques,1999 Methodologies for Effective Writing Instruction in EFL and ESL Classrooms Al-Mahrooqi, Rahma,2014-10-31 Educators continue to strive for advanced teaching methods to bridge the gap between native and non native English speaking students Lessons on written forms of communication continue to be a challenge recognized by educators who wish to improve student comprehension and overall ability to write clearly and expressively Methodologies for Effective Writing Instruction in EFL and ESL Classrooms brings together research and practices for successful written communication teaching among students of diverse linguistic backgrounds With technological advancements and resources educators are able to implement new tools into their lesson plans for the benefit of their students This publication is an essential reference source for professionals educators and researchers interested in techniques and practices for written communication in English language teaching geared towards non native English speaking students **The Latest and Best of TESS** ,1991 *The German Language in British Higher Education* Sylvia Jaworska,2009 The discipline of German Studies in English speaking countries is in crisis and the situation in British Higher Education can be seen as a paradigmatic example Symptoms of the crisis are a dramatic decrease in the number of students financial difficulties and the resulting closures of German Departments Furthermore the language skills which finally emerge from universities are not always satisfactory The present book sheds light on key aspects of the institutionalised teaching and learning of German language in the UK The first part the macro context surveys the socio political developments that have recently affected the sector of modern languages and specifically the discipline of German Studies The second part the micro context zooms in to the teaching and learning as experienced from both students and teachers perspective Ultimately by linking the macro analysis with the micro findings the present book proposes a number of strategies which could contribute to the optimisation and enhancement of teaching and learning German in British Higher Education **Student's Guide to Writing Dissertations and Theses in Tourism Studies and Related Disciplines** Tim Coles,David Timothy Duval,Gareth Shaw,2013-05-02 Around the world every year very many students have to complete dissertations or theses as part of their undergraduate or masters studies in tourism and related subjects Often this substantial piece of self directed work is the culmination of their programmes More than just a means to consolidate their final grades it is also an exciting chance to research a topic of their choosing and a potential gateway to more advanced study as well as job offers and future career paths Yet for all these reasons many students view the dissertation as a tricky challenge This comprehensive book intends to take the stress and anxiety out of doing a dissertation in tourism studies and related disciplines The process is examined from the germination of an idea to the submission and assessment of the final document Written primarily for students conducting independent research for the first time this book offers simple advice

and a clear framework which students can adopt even in more advanced studies at masters and doctoral level This book debunks popular myths and aims to overcome common pitfalls It focuses on the aims and objectives as the DNA of every dissertation Rather than view it as a single overwhelming project the dissertation is presented as a series of more modest manageable yet crucially inter linked tasks that all students can successfully complete through careful preparation and effective time management Dissertations are not to be underestimated and they demand great care and attention but they can also be immensely rewarding and enriching experiences academically and personally This jargon free book is also written with overseas students specifically in mind drawing directly on our overseas students experiences This valuable resource contains start of chapter learning objectives and end of chapter checklists as well as numerous boxed case studies to further help assist students through their dissertation
