Brad Johnson,David G. Smith,2019-12-03 When it comes to mentoring women face more barriers than men Here s how men can help change that Increasingly new employees and junior members of any profession are encouraged sometimes stridently to find a mentor Four decades of research reveals

that the effects of mentorship can be profound and enduring strong mentoring relationships have the capacity to transform individuals and entire organizations But the mentoring landscape is unequal Evidence consistently shows that women face more barriers in securing mentorships than men and when they do find a mentor they may reap a narrow range of both professional and psychological benefits Athena Rising is a book for men about how to eliminate this problem by mentoring women deliberately and effectively Traditional notions of mentoring are modeled on male to male relationships yet women often report a desire for mentoring that addresses their interpersonal needs Women want mentors who not only understand this but truly honor it Coauthors W Brad Johnson and David G Smith present a straightforward no nonsense manual for men working in all types of institutions organizations and businesses to become excellent mentors to women because as women succeed lean in and assume leading roles in any organization or work context the culture will become more egalitarian effective and prone to retaining top talent **Coaching for Student Retention and Success at the Postsecondary Level: Emerging Research and Opportunities** Black, Ruth Claire,2018-07-03 Online degree programs have long faced the issue of retention and engagement from their students Proper support and guidance for students can encourage continuation in these programs and can help lead to student success Coaching for Student Retention and Success at the Postsecondary Level Emerging Research and Opportunities is a pivotal reference source that provides vital research on the application of student support systems as a promising intervention for post secondary retention and student success While highlighting topics such as student assessment online programs and professional identity this publication explores support strategies that boost retention as well as the methods of using support and guidance to promote student success This book is ideally designed for educational professionals educational organizations educational administrators universities and academics seeking current research on the effects of guidance on student retention rates and success **Becoming a teacher** Josef de Beer,2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone experience in any teacher education programme is the student teaching practicum a fter all this is where the rubber hits the road However many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research

findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e g Chapters 11 and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book **Professional Service Across the Field of Education** Joy Egbert,Mary F.
