Poredoš,2014-12-03 This book provides the latest research on a new alternative form of technology the magnetocaloric
energy conversion This area of research concerns magnetic refrigeration and cooling magnetic heat pumping and magnetic
power generation The book s systematic approach offers the theoretical basis of magnetocaloric energy conversion and its
various sub domains and this is supported with the practical examples Besides these fundamentals the book also introduces
potential solutions to engineering problems in magnetocalorics and to alternative technologies of solid state energy
conversion The aim of the book is therefore to provide engineers with the most up to date information and also to facilitate
the understanding design and construction of future magnetocaloric energy conversion devices The magnetocaloric energy
conversion represents an alternative to compressor based refrigerators and heat pumps It is a serious alternative to power
generation with low enthalpy heat sources This green technology offers an opportunity to use environmentally friendly solid
refrigerants and the potentially high energy efficiency follows the trends of future energy conversion devices This book is
intended for postgraduate students and researchers of refrigeration heat pumping power generation alternatives heat
regenerators and advanced heat transfer mechanisms **Quest For Zero-Point Energy** Moray B. King,2014-06-16 King
expands with diagrams on how free energy and anti gravity are possible The theories of zero point energy maintain there are
tremendous fluctuations of electrical field energy embedded within the fabric of space King explains the following topics
