This third extensively revised edition of *The Mammals of the Southern African Subregion* contains detailed descriptions of all mammals that occur naturally on the African mainland south of the Cunene and Zambezi rivers together with all mammals indigenous to the subregion's coastal waters The rapid accumulation of new information resulting from mammal research in southern Africa together with radical taxonomic changes across all levels of mammalian classification have necessitated this

new edition which presents the best and latest data accurately in one comprehensive volume for use not only by scientists but also by an increasingly wide audience of general readers with an interest in the natural history of southern Africa J D Skinner and C T Chimimba have revised expanded and updated the text in a major project overseen by an editorial committee constituted by the Mammal Research Institute at the University of Pretoria Specialists on each mammalian order have served as subeditors and a range of independent and internationally recognised authorities have reviewed every species description In this edition all the distribution maps and many of the illustrations of mammal prints have been updated and redrawn several new colour plates have been added and the whole design of this definitive reference work has been enhanced to ensure easy access to information

BOOK JACKET **Health of Antarctic Wildlife** Knowles R. Kerry, Martin Riddle, 2009-07-29 comprehensively up to date We are most grateful to these authors and to those we recruited to write the additional chapters necessary to fill the significant gaps We acknowledge also the sacrifice of some who presented results of original research and have thus suffered a longer time than usual to publication The timing of publication however has provided the opportunity to highlight recent discussions and resolutions made within the Antarctic Treaty forum to protect wildlife against disease and to include responses by Government and non Government operators in Antarctica These developments mostly followed from the Workshop on Diseases of Antarctic Wildlife The book comprises 17 chapters presented in two parts Wildlife disease consists of reviews case studies and health assessments and External factors covers the environmental administrative and legal aspects Each chapter is complete and contains all references Six important documents are provided as Appendices These present methods reviews and other documents which are referred to in one or more chapters but are not readily available There are many related topics we have been unable to cover that would enhance the understanding of health and disease processes in Antarctica While we acknowledge their importance they are outside the scope of the present volume Such topics include epidemiology new and emerging infectious diseases and the effects of climate change These topics are referred to in the various chapters where references to source material are given
