The Monkey's Voyage Alan de Queiroz,2014-01-07 Throughout the world closely related species are found on landmasses separated by wide stretches of ocean What explains these far flung distributions Why are such species found where they are

across the Earth Since the discovery of plate tectonics scientists have conjectured that plants and animals were scattered over the globe by riding pieces of ancient supercontinents as they broke up In the past decade however that theory has foundered as the genomic revolution has made reams of new data available And the data has revealed an extraordinary stranger than fiction story that has sparked a scientific upheaval In *The Monkey's Voyage* biologist Alan de Queiroz describes the radical new view of how fragmented distributions came into being frogs and mammals rode on rafts and icebergs tiny spiders drifted on storm winds and plant seeds were carried in the plumage of sea going birds to create the map of life we see today In other words these organisms were not simply constrained by continental fate they were the makers of their own geographic destiny And as de Queiroz shows the effects of oceanic dispersal have been crucial in generating the diversity of life on Earth from monkeys and guinea pigs in South America to beech trees and kiwi birds in New Zealand By toppling the idea that the slow process of continental drift is the main force behind the odd distributions of organisms this theory highlights the dynamic and unpredictable nature of the history of life In the tradition of John McPhee's *Basin and Range* *The Monkey's Voyage* is a beautifully told narrative that strikingly reveals the importance of contingency in history and the nature of scientific discovery

such a glorious confusion on deck that those who were novices in military and naval affairs might deem as they gazed around it could never subside into any thing approaching order Every one however was saying it would be very different when the ship was at sea of which indeed there was little doubt for to go on as we were would have been impossible Off the Isle of Wight the pilot left us to our captain s guidance the breeze was favourable we were sailing so smoothly there was scarcely any motion The last farewell tears dropped as I passed the Needles and the coast of Hampshire whilst memory recalled the happy days I had spent there and in the Forest the beautiful Forest Such thoughts and feelings it was necessary to throw aside I joined the party in the cuddy scrutinized the strange faces and retired to my cabin with as solitary a feeling as if my husband and I had been exiles for ever The voyage began prosperously I was satisfied with the captain with my cabin with my servant and happy with my lord and master We regretted we had taken our passage in a ship full of troops and anticipated we should be debarred taking exercise on the quarter deck and enjoying ourselves with walk and talk during the fine moonlight nights In the Ely it appeared as if it would be impossible were you to attempt it you would be sure to blunder over some sleeping Lancer However the band was on board some small consolation and as the society was large there was more chance of entertainment
