Arons, 2006-10-03 In this book Wendy Arons examines how women writers used theater and performance to investigate the problem of female subjectivity and to intervene in the dominant discourse about ideal femininity Arons shows how contemporary demands for sincerity and authenticity placed a peculiar burden on women in the public sphere especially on actresses who like professional writers overstepped the boundaries of what was considered proper behavior for women Paradoxically in their representations of ideal women engaged in performance these writers expose ideal femininity as an impossible act even as they attempt to perform it in their writing and in their lives Deutsche Mystiker Des Vierzehnten Jahrhunderts F. 'Material Delight and the Joy of Living' Michael North, 2017-03-02 Eighteenth century Europe witnessed a commercialization of culture as it became less courtly and more urban The marketing of culture became separate from the production of culture New cultural entrepreneurs entered the stage the impresario the publisher the book seller the art dealer the auction house and the reading society served as middlemen between producers and consumers of culture and constituted at the same time the beginning of a cultural service sector Cultural consumption also played a substantial role in creating social identity One could demonstrate social status by attending an auction watching a play or listening to a concert Moreover and eventually more significant one could demonstrate connoisseurship and taste which became important indicators of social standing The centres of cultural exchange and consumption were initially the great cities of Europe In the course of the eighteenth century however cultural consumption penetrated much deeper for example into the numerous residential and university towns in Germany where a growing number of functional elites and burghers met in coffee houses and reading societies attended the theatre and opera and performed orchestral and chamber music together Journals novels and letters were also crucial in forming consumer culture in provincial Germany as the German states were remote from the cultural life of England and France the material reality of London and Paris often passed as a literary construction to Germany It is against this background and stimulated by the research of John Brewer on England that the book systematically explores this field for the first time in regard to the Continent and especially to eighteenth century Germany Michael North focuses chapter by chapter on the new forms of entertainment concerts theatre opera reading societies travelling on the one hand and on the new material culture fashion gardens country houses furniture on the other At the centre of the discussion is the reception of English culture on the Continent and the competition between English and French fashions in the homes of German elites and burghers attracts special attention The book closes with an investigation of the role of cultural consumption for identity formation demonstrating the integration of Germany into a European cultural identity during the eighteenth century
