Einstein And The Poet In Search Of The Cosmic Man:

Einstein and the Poet William Hermanns, Albert Einstein, 1983 Centering on the close 34 year relationship with Einstein the author begins this absorbing book by describing his vow on the battlefield of Verdun God save me and I will serve you as long as I live A member of the League for Human Rights the Alexander von Humboldt International Club and other peace organizations Professor Hermanns became a disciple of Albert Einstein *Deep Semantics and the Evolution of New Scientific Theories and Discoveries* Adi, Tom, Abdelghany, Hala, Adi, Kathy, 2019-04-22 Combining a variety of sounds to form words that can be understood by other individuals language is one of the defining characteristics of the human species However since even highly educated people great writers and poets are not consistent regarding the meanings of words we are unlikely to find consistent rules regarding word meanings by examining human language use Therefore deep semantics aims to study of the meanings of individual sounds and their role in creating the meanings of words Deep Semantics and the Evolution of New Scientific Theories and Discoveries provides innovative insights into the mental processing of word meanings and lack of consistency in human use while providing examples from different language sources such as the Quran and Arabic text This publication presents word roots the human cognitive system sound function and knowledge process and is designed for linguists educators speech professionals researchers students and academics whose interests include topics on the study of people s imperfect views feelings and habits in using words The Soul's Upward Yearning Robert Spitzer, S.J., Ph.D., 2015-10-03 Western culture has been moving away from its Christian roots for several centuries but the turn from Christianity accelerated in the 20th century At the core of this decline is a loss of a sense of our own transcendence Scientific materialism has so seriously impacted our belief in human transcendence that many people find it difficult to believe in God and the human soul This anti transcendent perspective has not only cast its spell on the natural sciences psychology philosophy and literature it has also negatively impacted popular culture through the writings of Richard Dawkins Daniel Dennett and many others The warning signs of this loss of transcendence have been expressed by thinkers as diverse as Carl Jung psychiatrist Mircea Eliade historian of religion Gabriel Marcel philosopher C S Lewis and J R R Tolkien These warnings were validated by a 2004 study in the American Journal of Psychiatry which showed that the absence of religion alone was responsible for a marked increase in suicide rates sense of meaningless substance abuse separation from family and other psychiatric problems Thus the loss of transcendence is negatively affecting not only individuals sense of happiness dignity ideals virtues and destiny but also the culture Ironically the evidence for transcendence is greater today than in any other period in history The problem is this evidence has not been compiled and propagated Fr Spitzer s book provides a bright light in the midst of this cultural darkness by presenting both traditional and contemporary evidence for God and a transphysical soul from several major sources He also shows how human consciousness and intelligence is completely special and cannot be replicated by artificial intelligence or animal consciousness We are transcendent beings with souls capable of surviving

bodily death self reflective beings aware of perfect truth love goodness and beauty We are beings with an unrestricted capacity to know and create science law culture art music literature and so much more The evidence reveals that we have the dignity of being created in the very image of God and if we underestimate it we will undervalue one another underlive our lives and underachieve our destiny This work is the most comprehensive treatment of human transcendence available today
