El Nino And La Nina Deadly Weather American Disasters:

El Niño & La Niña Carmen Bredeson, 2002 Explores the causes and effects of this weather phenomenon and the impact it has on society **El Niño** A. M. Babkina, 2003 The term El Niño Spanish for the Christ Child was originally used by fishermen along the coasts of Ecuador and Peru to refer to a warm ocean current that typically appears around Christmastime and lasts for several months Fish are less abundant during these warm intervals yet in some years however the water is especially warm and the break in the fishing season persists into May or even June El Niño also brings heavy rains During the past 40 years nine El Niños have affected the South American coast Most of them raised water temperatures not only along the coast but also at the Galapagos islands and in a belt stretching 5000 miles across the equatorial Pacific The weaker events raised sea temperatures only by one to two degrees Fahrenheit but the strong ones like the El Niño of 1982-83 left an imprint not only upon the local weather and marine life but also on climatic conditions around the globe This book includes a detailed overview and bibliography with complete title author and subject indexes **Deadly Storm Alert!** Carmen Bredeson, 2013-01-01 A revised series provides detailed overviews of devastating world disasters weaving together important background information with gripping accounts from survivors and victims **The Anthropology of Disasters in Latin America** Virginia García-Acosta, 2019-12-09 This book offers anthropological insights into disasters in Latin America It fills a gap in the literature by bringing together national and regional perspectives in the study of disasters The book essentially explores the emergence and development of anthropological studies of disasters It adopts a methodological approach based on ethnography participant observation and field research to assess the social and historical constructions of disasters and how these are perceived by people of a certain region This regional perspective helps assess long term dynamics regional capacities and regional global interactions on disaster sites With chapters written by prominent Latin American anthropologists this book also considers the role of the state and other nongovernmental organizations in managing disasters and the specific conditions of each country relative to a greater or lesser incidence of disastrous events Globalizing the existing literature on disasters with a focus on Latin America this book offers multidisciplinary insights that will be of interest to academics and students of geography anthropology sociology and political science **El Niño Ready Nations and Disaster Risk Reduction** Michael H.
