Tim Lang

Food And Agriculture In Britain 1939 45 Aspects Of Wartime Control:

Food and Agriculture in Britain 1939-45 R. J. Hammond, 1945 Food and War in Twentieth Century Europe Rachel Duffett, 2016-04-22 Wars cannot be fought and sustained without food and this unique collection explores the impact of war on food production allocation and consumption in Europe in the twentieth century A comparative perspective which incorporates belligerent occupied and neutral countries provides new insights into the relationship between food and war The analysis ranges from military provisioning and systems of food rationing to civilians survival strategies and the role of war in stimulating innovation and modernization **Food and Agriculture in Britain 1939-1945** R. J. Hammond, 1954

British Food Policy During the First World War (RLE The First World War) Margaret Barnett, 2014-04-24 Because of the exceptionally high proportion of imports in Britain's food supply and the determined efforts of the enemy to sever the supply lines efficient management of food resources was an essential element in the British national war effort This volume was the first comprehensive study of this vital aspect of government strategy and fills a gap in the historiography of this period This volume provides a balanced picture by drawing together the diverse elements that went into food policy economic and social trends international trade relations and labour issues The author also traces the evolution of food policy during the pre war planning period and the early part of the war and analyses the roles of the United States and the labour organizations **A Guide to the Sources of British Military History** Robin HIlgham, 2015-10-05 Designed to fill an

overlooked gap this book originally published in 1972 provides a single unified introduction to bibliographical sources of British military history Moreover it includes guidance in a number of fields in which no similar source is available at all giving information on how to obtain access to special collections and private archives and links military history especially during peacetime with the development of science and technology *Feeding Britain* Tim Lang, 2020-03-26 How does Britain get its food Why is our current system at breaking point How can we fix it before it is too late British food has changed remarkably in the last half century As we have become wealthier and more discerning our food has Europeanized pizza is children's favourite food and internationalized we eat the world's cuisines yet our food culture remains fragmented a mix of mass ultra processed substances alongside food as varied and good as anywhere else on the planet This book takes stock of the UK food system where it comes from what we eat its impact fragilities and strengths It is a book on the politics of food It argues that the Brexit vote will force us to review our food system Such an opportunity is sorely needed After a brief frenzy of concern following the financial shock of 2008 the UK government has slumped once more into a vague hope that the food system will keep going on as before Food they said just required a burst of agri technology and more exports to pay for our massive imports *Feeding Britain* argues that this and other approaches are short sighted against the public interest and possibly even strategic folly Setting a new course for UK food is no easy task but it is a process this book urges that needs to begin now Tim Lang has performed a public service Simon Jenkins Sunday Times **Agricultural Economics**

Research ,1955 **The Battle of the Fields** Brian Short,2014 This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front The Battle of the Fields tells the story of rural community and authority in Britain during the Second World War by looking at the County War Agricultural Executive Committees From 1939 they were imbued with powers to transform British farming to combat the loss of food imports caused by German naval activity and initial European mainland successes Their powers were sweeping and draconian When fully exercised against recalcitrant farmers dispossession in part or whole could and did result This book includes the most detailed analysis of these dispossessions including the tragic case of Ray Walden the Hampshire farmer who was killed by police after refusing to leave his farmhouse in 1940 The committees were deemed successful by Whitehall as harbingers of modernity mechanization draining artificial fertilizers reclamation of heaths marshes and woodlands We now deplore some of these changes but Britain did not starve in large part thanks to their efforts This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago BRIAN SHORT is Emeritus Professor of Historical Geography at the University of Sussex and formerly Dean of School and Head of the Department of Geography Taste, Trade and Technology Richard Perren,2017-09-29 Focusing on the interactions of producers sellers and consumers of meat across the world Richard Perren elucidates aspects of the evolution of the international economy and the part played by the investment of capital and the enterprise of individuals The study utilises the government reports and papers issued by all countries involved in the meat trade including North and South America Australia New Zealand and Britain Beginning in the nineteenth century allows a comprehensive analysis of how an efficient meat exporting industry was built The industry required investment which was part of the general process of economic development Perren focuses on the nature of the firms involved with the trade the part played in the industry's development by foreign investment and the encouragement given by governments Close attention is also paid to the stimulus of war the impact of animal health and food hygiene regulations on producers and the competing demands of interest groups involved in the food businesses By taking an historical as well as a contemporary approach the book contributes to the current discussion on the effectiveness of animal and meat inspection in identifying farm livestock diseases such as tuberculosis and BSE This study advances our knowledge of the process of food distribution in the industrialising and post industrial economies and leads to a comprehensive understanding of an important component of the international food chain **War and Economic Development** David Joslin,1975-04-10 This book of essays is a collective treatment of the problem of the impact of war on economic development in Europe This subject has been neglected despite the fact that the issues it raises are of direct concern to students of

military history the history of science and technology the history of education historical demography as well as to students of political social and economic history The contributors to this volume have drawn on work done in all these fields Taken together this study provides the foundation for further comparative work on the effect of war and warfare on economic life The contributors have approached the problem from two sides The subject of a number of essays is the internal history of armed conflict These focus on war itself and discuss the mobilization of resources which precedes it and the ways that economic activity and policy are altered by it **Feeding the People** Rebecca Earle,2020-06-25 Potatoes are the world s fourth most important food crop yet they were unknown to most of humanity before 1500 Feeding the People traces the global journey of this popular foodstuff from the Andes to everywhere The potato s global history reveals the ways in which our ideas about eating are entangled with the emergence of capitalism and its celebration of the free market It also reminds us that ordinary people make history in ways that continue to shape our lives Feeding the People tells the story of how eating became part of statecraft and provides a new account of the global spread of one of the world s most successful foods

The Cambridge History of the Second World War: Volume 3, Total War: Economy, Society and Culture Michael Geyer,Adam Tooze,2015-04-23 The conflict that ended in 1945 is often described as a total war unprecedented in both scale and character Volume 3 of The Cambridge History of the Second World War adopts a transnational approach to offer a comprehensive and global analysis of the war as an economic social and cultural event Across twenty eight chapters and four key parts the volume addresses complex themes such as the political economy of industrial war the social practices of war the moral economy of war and peace and the repercussions of catastrophic destruction A team of nearly thirty leading historians together show how entire nations mobilized their economies and populations in the face of unimaginable violence and how they dealt with the subsequent losses that followed The volume concludes by considering the lasting impact of the conflict and the memory of war across different cultures of commemoration *Austerity in Britain* Ina Zweiniger-Bargielowska,2000-05-04 Austerity in Britain is the first book to explore the entire episode of rationing austerity and fair shares from 1939 until 1955 These policies were central to the British war effort and to post war reconstruction The book analyses the connections between government policy consumption gender and party politics during and after the Second World War The economic background to austerity the policy s administration and changes in consumption standards are examined Rationing resulted in at times extensive black markets and popular attitudes to the policy ranged from wartime acquiescence to post war discontent Austerity in Britain qualifies the myth of common sacrifice on the home front and highlights the limitations of the fair shares policy which failed to achieve genuine equality between classes or between men and women The continuation of rationing and austerity policies after 1945 was central to party politics Disaffection particularly among women undermined Labour s popularity while the Conservatives critique of austerity was instrumental to the party s victories at the general elections of 1951 and 1955 **A Game of Birds and Wolves** Simon Parkin,2020-01-28

As heard on the New Yorker Radio Hour The triumphant and engaging history The New Yorker of the young women who devised a winning strategy that defeated Nazi U boats and delivered a decisive victory in the Battle of the Atlantic By 1941 Winston Churchill had come to believe that the outcome of World War II rested on the battle for the Atlantic A grand strategy game was devised by Captain Gilbert Roberts and a group of ten Wrens members of the Women s Royal Naval Service assigned to his team in an attempt to reveal the tactics behind the vicious success of the German U boats Played on a linoleum floor divided into painted squares it required model ships to be moved across a make believe ocean in a manner reminiscent of the childhood game Battleship Through play the designers developed Operation Raspberry a counter maneuver that helped turn the tide of World War II Combining vibrant novelistic storytelling with extensive research interviews and previously unpublished accounts Simon Parkin describes for the first time the role that women played in developing the Allied strategy that in the words of one admiral contributed in no small measure to the final defeat of Germany Rich with unforgettable cinematic detail and larger than life characters A Game of Birds and Wolves is a heart wrenching tale of ingenuity dedication perseverance and love bringing to life the imagination and sacrifice required to defeat the Nazis at sea

Marché Noir Kenneth Mouré,2023-03-23 Kenneth Mour shows how the black market in Vichy France developed not only to serve German exploitation but also as an essential strategy for survival for commerce and consumers His analysis explains how and why the black market became so prevalent and powerful in France and remained necessary after Liberation March Noir draws on diverse French archives as well as diaries memoirs and contemporary fiction to highlight the importance of the black market in everyday life Vichy s economic controls set the context for adaptations by commerce facing economic and political constraints and by consumers needing essential goods Vichy collaboration in this realm seriously damaged the regime s legitimacy March Noir offers new insights into the dynamics of black markets in wartime and how illicit trade in France served not only to exploit consumer needs and increase German power but also to aid communities in their strategies for survival

Advertising and Propaganda in World War II David Clampin,2014-03-21 The Blitz the period of Nazi bombing campaigns on civilian Britain during World War II was a formative period for British national identity In this groundbreaking book David Clampin looks at the images campaigns and slogans which helped to form the fabled Blitz spirit powerfully echoed in Winston Churchill s speeches Because advertisers attempted to capitalise on war time patriotism Clampin s unique focus on advertising provides a visually rich seam of new information on the everyday war and makes an enormous contribution to the debate on people s experiences of war and nationalism Using a remarkable and hitherto unseen range of primary source material advertisements in the press slogans and posters this work will reshape the contested meanings of the Home Front opening up cultural history discourses on gender and nationalism Advertising and Propaganda in World War II is essential reading for historians of World War II as well as students and scholars of Media Studies and Communication Studies

Food for War Alan F. Wilt,2001-09-20 Food for War is a ground breaking study of

Britain's food and agricultural preparations in the 1930s as the nation once again made ready for war. Historians writing about 1930s Britain have usually focused on the Depression, appeasement, or political, military, and industrial concerns. None have dealt adequately with another significant topic: food and agriculture as the nation moved, albeit reluctantly, from peace to war. In this new account, Alan F. Wilt makes right this omission by examining in depth the relationship between food, agriculture, and the nation's preparations for war. He reveals how food and agriculture became closely linked to rearmament as early as 1936; that the government's preparations in this sector, as contrasted with other areas of the economy, were relatively well developed when war broke out in 1939; and that rural and farm interests well understood the effect that war would have on their way of life. He argues that food and agriculture need to be integrated into the more general historical discourse for what happened in Britain in the 1930s not only set the stage for World War II but also contributed to a more robust agriculture in the decades that followed.

Food and Agriculture in Britain 1939-45 Reginald James William Hammond, 1954 *The Journal of Agricultural Economics Research*, 1987 **Catalogue of Copyright Entries**, 1954
