Food Authentication:

Food Authentication Philip R. Ashurst, M.J. Dennis, 2013-11-11 The issue of food authenticity is not new For centuries unscrupulous farmers and traders have attempted to extend or otherwise alter their products to maximise revenues In recent years the subject has reached new prominence and there even have been situations where food authenticity has featured as a newspaper headline in various countries Food legislation covering the definition and in some cases composition of various commodities has been in place in developed countries for many years and paradoxically it is the legislative trend away from emphasis on composition and more on accurate and truthfullabeliing that has been one driving force for the authenticity issue Another and many would speculate as the more potent driving force is the move towards fewer and larger supermarket chains in many countries Such trading companies with their images of quality products buying power and commercial standing exercise considerable commercial power which has been claimed as a significant source of financial pressure on food prices and food commodity product quality For whatever reason recent food authenticity issues have become news and consumers the media and enforcement authorities are showing more interest than ever before in the subject

Food Authentication and Traceability Charis M. Galanakis, 2020-11-19 Food Authenticity and Traceability covers the most recent trends and important topics in food authentication with an emphasis on the components of a food traceability systems The book discusses techniques such as omics based technologies chromatographic methods mass spectrometry hyperspectral and chemical imaging molecular and DNA based techniques chemometrics and data mining algorithms high throughput sequencing and non targeted fingerprinting approaches and proteomics Includes information on blockchain for food traceability analysis Discusses consumer preferences and perceptions regarding food traceability drivers and food fraud Presents approaches of authentication for food of animal origin and omics based technologies

Emerging Food Authentication Methodologies Using GC/MS Kristian Pastor, 2023-07-27 This edited book provides an overview of existing and emerging gas chromatography mass spectrometry GC MS based methods for the authentication and fraud detection in all major food groups and beverages Split in four parts the book opens with a comprehensive introduction into the GC MS technique and a summary of relevant statistical and mathematical models for data analysis The main parts focus on the authentication of the main food groups cereals dairy products fruit meat etc and beverages e g coffee tea wine and beer The chapters in these sections follow a distinct structure describing the nutritional value of the product common fraud practices economic implications and relevant biomarkers for the authentication process such as volatile compounds fatty acids amino acids isotope ratios etc The final chapter provides an outlook on where the methodologies and the applications may be heading for Food fraud is serious problem that affects food industries of all kinds which is why food authentication plays an increasingly important role This book aims to serve as a knowledge base for all researchers in academia regulatory laboratories and industry employing GC MS for food analysis Due to its comprehensive introduction and consistent structure

Proteomics for Food Authentication Leo M.L. Nollet, Semih Ötles, 2020-05-07 Consumers have the right to know what is in the food they are eating and accordingly a number of global food regulations require that the provenance of the food can be guaranteed from farm to fork Many different instrumental techniques have been proposed for food authentication Although traditional methods are still being used new approaches such as genomics proteomics and metabolomics are helping to complement existing methodologies for verifying the claims made about certain food products During the last decade proteomics the largescale analysis of proteins in a particular biological system at a particular time has been applied to different research areas within food technology Since proteins can be used as markers for many properties of a food even indicating processes to which the food has been subjected they can provide further evidence of the foods labeling claim Proteomics for Food Authentication a volume in the Food Analysis and Properties Series is a comprehensive and updated overview of the applications drawbacks advantages and challenges of proteomics for food authentication Features Provides a comprehensive
