 M. Trautmann, 2013 The editors of this book have a straightforward goal to inspire you to engage your students through
 public collaboration in scientific research also known as citizen science The book is specifically designed to get you
 comfortable using citizen science to support independent inquiry through which your students can learn both content and
 process skills Citizen Science offers you Real life case studies of classes that engaged in citizen science and learned authentic
 scientific processes and the habits of mind associated with scientific reasoning Fifteen stimulating lessons you can use to
 build data collection and analysis into your teaching Plenty of flexibility You can use the lessons with or without access to
 field or lab facilities whether or not your students can collect and submit data of their own and inside your classroom or
 outside through fieldwork in schoolyards parks or other natural areas in urban or rural settings You don't need an advanced
 degree in science to guide your students in productive participation in one of a growing variety of citizen science projects As
 the editors note Such involvement can scaffold teachers entry into facilitating student investigation while connecting
 students with relevant meaningful and real experiences with science Higher Education and SDG14 Simon J Davies, Paul
