Food Preservation By Irradiation:

Food Preservation and Irradiation S. N. Mahindru, 2013 *Food Preservation by Irradiation* Grace M. Urrows, 1968

Food Irradiation Technologies Isabel C F R Ferreira, Amílcar L Antonio, Sandra Cabo Verde, 2017-12-19 Food preservation by irradiation is gaining recognition as a technology that is more environmentally benign than other current processes such as post harvest chemical fumigation it has less impact on thermally sensitive compounds than thermal decontamination technologies such as hot water or steam and the technology is more accessible and cheaper As the technical and economic feasibility as well as the level of consumer acceptance have increased its use has been growing fast International organizations including the Food and Agriculture Organization of the United Nations FAO the International Atomic Energy Agency IAEA and the World Health Organization WHO have coordinated and worked with others to develop norms and review the safety and efficacy of irradiated foods Commended in the Foreword by Carl Blackburn Food Irradiation Specialist Joint FAO IAEA Division of Nuclear Techniques in Food and Agriculture this book makes a strong case for the use of this overwhelmingly safe food processing technique This comprehensive book is a useful reference for food technologists analytical chemists and food processing professionals covering all aspects of gamma electron beam and X ray food irradiation its impact on food matrices and microorganisms legislation and market aspects It is the first book to cover control and structural analysis in food irradiation and being written by leading experts in the field addresses the current global best practices It contains updated information about the commercial application of food irradiation technology especially regarding the type of radiation based on food classes and covers dosimetry radiation chemistry food decontamination food quarantine food processing and food sterilization

Food Irradiation R. A. Molins, 2001-05-24 In 1997 the FDA approved the use of low dose ionizing radiation to eliminate pathogens in red meat This food processing technology can improve the safety of food and extend the shelf life of certain foods by eliminating pathogenic bacteria parasites and other microorganisms that cause food borne disease Currently forty two countries practice some form of food irradiation Food Irradiation Principles and Applications provides a comprehensive up to date account of food irradiation principles effects applications and limitations including global regulatory issues and the economics of food irradiation Written by an international panel of scientists this book focuses on science and technology and offers thorough coverage of the current use of food irradiation around the world The contributors in this book present irradiation as a truly critical control point for raw solid foods of animal origin Food Irradiation Principles and Applications discusses such topics as Radiation inactivation of microorganisms Disinfestation of stored grains pulses dried fruits and nuts Irradiation as a quarantine treatment Irradiation of meat and poultry fish and shellfish fruits and vegetables and tuber and bulb crops Radiation decontamination of spices herbs condiments and other dried food ingredients Process control and dosimetry in food irradiation Food professionals in both academia and industry as well as food safety experts food scientists research scientists and food processing managers

will find *Food Irradiation Principles and Applications* a reliable and valuable reference

Food Preservation by Irradiation, 1978 Abstract Ionizing radiation represents an economical though underutilized method for preserving food The technical economic regulatory and health aspects of food irradiation were the topics of an international symposium November 1977 the participants recognized the importance of food irradiation in the context of world wide food shortages Volume I reviews principles and applications of food irradiation technology Control of physiological changes in plants animal infestation and microbial spoilage is examined Chemical changes induced by irradiation are described Volume II considers toxicological studies microbiological changes in food public health approval and consumer acceptance of irradiated food and economics and energy issues Irradiation facilities are also discussed A plan of action for food irradiation in the future is presented
