Novel Plant Protein Processing Zakir Showkat Khan, Sajad Ahmad Wani, Shemilah Fayaz, 2023-12-29 Proteins serve as an important nutritional as well as structural component of foods Not only do they provide an array of amino acids necessary for maintaining human health but also act as thickening stabilizing emulsifying foaming gelling and binding agents The ability of a protein to possess and demonstrate such unique functional properties depends largely on its inherent structure configuration and how they interact with other food constituents like polysaccharides lipids and polyphenolic compounds Proteins from animal sources have superior functionality higher digestibility and lower anti nutrient components than plant proteins However consumer preferences are evolving worldwide for ethically and sustainably sourced clean cruelty free vegan or vegetarian plant based food products Unlike proteins from animal sources plant proteins are more versatile religiously and culturally acceptable among vegetarian and vegan consumers and associated with lower food processing waste water and soil requirement Thus the processing and utilization of plant proteins have gained worldwide attention and as such numerous scientific studies are focusing on enhancing the utilization of plant proteins in food and pharmaceutical products through various processing and modification techniques to improve their techno functional properties bioactivity bioavailability and digestibility

Novel Plant Protein Processing Developing the Foods of the Future presents a roadmap for plant protein science and technology which will focus on plant protein ingredient development plant protein modification and the creation of plant protein based novel foods Key Features Includes complete information about novel plant protein processing for use as future foods Presents a roadmap to upscale the meat analog technological processes Discusses marketing limitations of plant based proteins and future opportunities This book highlights the important scientific technological advancements that are being deployed in the future foods using plant proteins concerns opportunities and challenges and as an alternative to maintaining a healthy and sustainable modern food supply It covers the most recent research related to the plant protein based future foods which

include their extraction isolation modification characterization development and final applications It also covers the formulation and challenges emphasis on the modification for a specific use legal aspects business perspective and future challenges This book is useful for researchers readers scientists and industrial people to find information easily Animal Science Reviews 2010 David Hemming,2011 Animal Science Reviews 2010 provides scientists and students in animal science with timely analysis on key topics in current research Originally published online in CAB Reviews this volume makes available in printed form the reviews in animal science published during 2010 *Dairy Foods* Adriano Gomes Da Cruz,Chaminda Senaka Ranadheera,Filomena Nazzaro,Amir Mortazavian,2021-09-22 Dairy Foods Processing Quality and Analytical Techniques provides comprehensive knowledge on the different factors involved in the development and safety precautions behind dairy foods including special references to both theoretical and practical aspects The book presents relevant information about the quality of dairy foods including raw milk quality predictive microbiology and risk analysis food defense and food fraud In addition it looks into environmental aspects and consumer perception and goes on to cover methods and practices to process dairy products and analytical techniques behind dairy product development Techniques explored include time domain magnetic resonance thermal analysis and chemometric methods This will be a valuable resource for researchers and practitioners in the dairy industry as well as students in dairy science courses Offers a comprehensive accounting on the latest analytical methods used in the dairy industry Focuses on the processing of dairy foods including emerging and novel dairy products with low sodium and sugar contents Sourced from a team of editors with relevant expertise in dairy food processing *Non-Thermal Processing of Functional Foods* Sudip Kumar Pattanayek,Debashis Dutta,Ajay Singh,2024-12-31 Functional foods also known as nutraceuticals began to gain prominence in the 1980s in Japan as foods for specified health use and became more widely recognized in the 1990s as research and interest in foods that could provide specific health benefits beyond essential nutrition grew worldwide These foods are typically enriched with bioactive components or formulated to contain substances or live microorganisms with a possible health enhancing or disease preventing value and at a safe and sufficiently high concentration to achieve the intended benefit Usually the added ingredients are classified as nutrients dietary fiber phytochemicals other substances or probiotics The production storage and consumer consumption of these functional foods require special attention to preserve quality attributes The production process of these foods can be classified as conventionally used thermal processing methods and non thermal alternatives In addition these processes may be combined with biological approaches involving enzymatic treatment and fermentation The various non thermal processes such as ultrasounds high hydrostatic pressure vacuum impregnation high voltage electrical discharge cold plasma pulsed light ozonation etc can be utilized for a product to sustain preserve quality attributes of the ingredients long shelf life and sensory qualities This book compiles the latest non thermal processing technologies to develop functional foods The book discusses bioactivity bioaccessibility and bioavailability related

to nutrition and functional food ingredients It has 16 articles on different aspects of non thermal processing technologies Chapter 1 has discussed a general overview of emerging technologies and various non thermal processing techniques are discussed in Chapters 2 6 8 9 and 12 Chapters 7 11 13 15 and 16 discuss food safety and preservation We have discussed the functional foods and bioactive compounds in Chapters 10 and 14 A few of these reviews discuss the impact of developing non thermal technologies on several food components proteins carbohydrates lipids minerals vitamins polyphenols glucosinolates fragrance compounds and enzymes while maintaining the structure and functional properties This book is an excellent source of information for professionals postgraduate students and researchers in food sciences and chemical engineering
