Foot and Mouth Disease A.J. van der Zijpp, M.J.E. Braker, C.H.A.M. Eilers, H. Kieft, T.A. Vogelzang, S.J. Oosting, 2023-08-28 A Foot and Mouth Disease outbreak is not by definition similar to a Foot and Mouth Disease crisis Why then did the 2001 outbreak result in a crisis situation in the Netherlands It was not because nobody was prepared for it The Ministry of Agriculture Nature Management and Fisheries had a scenario in stock The scenario was applied as intended The scenario did what it was supposed to do it prevented the spreading of the disease it resulted in a relatively soon eradication of the disease and it minimised damage to agricultural exports Nevertheless the crisis was there Foot and Mouth Disease new values innovative research agenda s and policies reports a process in which individuals and groups involved in the crisis participated in a joint analysis of what caused the crisis and in the making of a policy and research agenda The conclusion was that ignorance of the societal function of animals and countryside was the cause of the crisis the scenario focussed on Foot and Mouth Disease control in a production oriented environment In reality many people perceived that the scenario and its rigid application threatened nonproduction values such as the companion role of animals and the recreation function of the landscape Inevitably a next outbreak of Foot and Mouth Disease will occur However research and policy makers should seriously take up this perception of animals and countryside to prevent an outbreak of becoming a deep crisis again **EU beef farming systems and CAP regulations** Patrick Sarzeaud, Andie Dimitriadou, Milan Zjalic, 2023-08-28 The new Common Agricultural Policy launched in 2003 and implemented since 2005 appears as a big change mainly due to the introduction of the Single Payment Scheme and the decoupling of subsidies from production EU beef production is one of the sectors mostly affected by the existing CAP regulations This book addresses what the impact could be on the future of European beef farming systems and in what ways could beef farmers adapt in order to ensure the sustainability of their farms Within the Cattle Network Working Group of EAAP a group of European economists The Beef Task Force composed of experts and researchers from a number of EU countries engaged in a common project with the object of monitoring and developing studies on policy impact and farm strategy analysis The BTF joined national studies into a common report which is divided into four parts the current picture of beef farming systems in Europe CAP implementation at national level first impact of reformed CAP on farming systems future evolution of European beef production and land use This book highlights disparities in CAP implementation and presents the main developments regarding EU beef farming systems size increase farm regional specialization adaptation to market requirements and eventually social expectations It is of interest to policy makers and all those who concern themselves with the cattle industry Ethical futures: bioscience and food horizons Kate Millar, Pru Hobson West, Brigitte Nerlich, 2023-09-04 In an ever changing interconnected world the agriculture and food system faces constant challenges in many forms such as the impacts of climate change uncertainty surrounding the use of novel technologies and the emergence of new zoonotic diseases Alongside these challenges professionals working in the food

system are faced with opportunities to improve food production and distribution As decision makers attempt to balance these threats and opportunities in order to secure more sustainable production systems the key question that arises is What do we envisage as the future for agriculture and food production With numerous voices advocating different and sometimes conflicting approaches ranging from organic farming to wider use of GMOs through in vitro meat production this discussion of the future raises significant ethical questions The contributions in this book bring together a diverse group of authors who explore a set of themes relating to the ethical dimensions of the agriculture and food futures including the role of novel technologies the potential issues raised by the use of biofuels the ethics of future animal production systems concepts of global food security as well as chapters on food governance priorities and educational aspects It is intended that this volume serves as an interesting collection and acts as a source of stimulation that will contribute to wider debate and reflection on the future of the agriculture and food system

Farm management and extension needs in Central and Eastern European countries under the EU milk quota system Abele Kuipers, Marija Klopčič, Arunas Svitojus, 2023-08-28 The introduction of a quota system has a large impact on the development of the agricultural sector the agro business and individual farms In April 2004 the Central and Eastern European CEE Countries entering the EU had to implement a quota system for milk It requires institution building setting up administrative procedures choices of the system choice of priority groups handling of butterfat reference dealing with a national reserve control aspects quota transfer farm management aspects and communication to farmers All early attention at national levels has been given to the administrative aspects of milk quota systems Communication to farmers about the system and the effects on farm management is often neglected This publication hopes to fill this gap and wants to stimulate attention on farm management and extension efforts It presents an overview of papers from old countries and country reports from new EU countries They all contain information about expected structural changes due to the quota system effects on farm management extension needs in this area and challenges in years ahead Impressions from 7 other CEE non EU countries are also included This book gives an extensive and unique overview of the dairy situation in the Central and Eastern European countries in the year of the enlargement of the EU and a view into the future in this regard

The European Commission for the Control of Foot-and-Mouth Disease Workplans - Phase V Second biennium 2021-2023 Food and Agriculture Organization of the United Nations, 2021-12-06 Foot and mouth Disease FMD remains the first transboundary animal disease TAD threat to European livestock production A single introduction usually has extremely serious and frequently catastrophic impacts The European Commission for the Control of Foot and Mouth Disease EuFMD under a framework of co ordination with EC DG SANTE FAO and OIE as played a significant role in reducing the risk and ensuring better preparedness Partly as a result of this the EU has not had for the first time in its history an outbreak of FMD case for the past ten years In this time the EuFMD has established an internationally respected capacity for efficient delivery of training and in country support to FMD Progressive Control Programmes and most recently

in modelling of FMD control measures to guide emergency planning The HOLD FAST strategy continues the focus upon FMD risk reduction but extends the scope of the preparedness and risk reduction activities to similar TADs which pose an immediate threat to the Member Nations hereafter FAST is used for FMD and similar TADs **Cultures of Technology**

and the Quest for Innovation Helga Nowotny, 2006-02-01 Underlying the current dynamics of technological developments their divergence or convergence and the abundance of options promises and risks they contain is the quest for innovation the contributors to this volume argue The seemingly insatiable demand for novelty coincides with the rise of modern science and the onset of modernity in Western societies Never before has the Baconian dream been so close to becoming reality wrapped into a globalizing capitalism that seeks ever expanding markets for new products artifacts and designs and new processes that lead to gains in efficiency productivity and profit However approaching these developments through a wider historical and cultural perspectives means to raise questions about the plurality of cultures the interaction between hardware and software and about the nature of the interfaces where technology meets with economic social legal historical constraints and opportunities The authors come to the conclusion that inside a seemingly homogenous package and a seemingly universal quest for innovation many differences remain Participatory smallholder dairy value chain development in Fogera woreda, Ethiopia: Experiences from IPMS project interventions ,

The Routledge Companion to Global Value Chains Renu Agarwal, Christopher Bajada, Roy Green, Katrina Skellern, 2021-09-30 This Companion provides a review of global value chains GVCs and the megatrends that are shaping them and will continue to reshape them in deep set trajectories of change over the next few decades Megatrends herald both challenges and opportunities With the growing interest among business leaders and researchers in GVCs this is a reference work which fills a gap in current literature by focusing on the new features of GVCs including the shift of global purchasing power towards developing economies the significance of emerging technologies and data analytics the increasing tensions between globalisation and de globalisation and the role of micro multinationals start up entrepreneurs the public sector and middle markets in a fast changing global economy The early chapters are essentially intradisciplinary in character with the first seeking to explore some historical aspects of GVCs Subsequent chapters cover the theory and practice of operations and supply chain management emerging supply chain technologies and the impact of inter firm collaboration across sectors and economies The final chapters take a more interdisciplinary approach and examine topics at the interface of GVCs with the economy society culture and politics This comprehensive handbook provides a timely analysis of leading edge global megatrends and practices in one volume **AI**
