Discovery and Empire John West-Sooby,2013 The French connection with the South Seas stretches back at least as far as the voyage of Binot Paulmier de Gonneville 1503 1505 who believed he had discovered the fabled great south land after being blown off course during a storm near the Cape of Good Hope The story of his voyage remained largely forgotten for over 150 years but eventually resurfaced in 1664 thanks to the publication by the Abbe Jean Paulmier of a document in which he argued on the basis of this supposed discovery for the establishment of a Christian mission in this third part of the world While historians today contest the authenticity of various aspects of the Abbe Paulmier s Memoires there is no doubt about the impact it had in France both on the collective imagination and more concretely on French plans for exploration and colonial expansion It was not until the eighteenth century however that France began sending mariners to the southern oceans on a regular basis and by that time a new maritime power had begun to emerge Great Britain Together these two nations would play a decisive role in determining the configuration of these little known parts of the globe and particularly of the Pacific which had for so long been the almost exclusive preserve of Spain From the Introduction by John West Sooby DISCOVERY AND EMPIRE is a collection of essays
