The Transatlantic Dialogue on Higher Education Ulla Kriebner, 2011 Comparing apples and oranges frequently this is what we do when we talk about similarities and differences regarding higher education in the United States and Europe Based on the assumption that higher education policy texts are cultural texts to be interpreted this book deconstructs four US American cultural narratives within higher education competition the frontier myth McDonaldization and the narrative of security and compares these to discourses prevailing in Europe Disputing the prevalent claim that both the recent European higher education transformation initiative the Bologna Process and the establishment of the European Higher Education Area EHEA have had absolutely no impact on US institutions of higher learning this study proves that cultural narratives in the last decade have strongly determined political and structural developments in higher education on both sides of the Atlantic This book therefore adds another facet to the transatlantic dialogue on higher education by providing a cultural critical perspective including the Foucauldian theory of governmentality as well as aspects of postcolonial theory

Footprints of Italian Reformers John Stoughton, 1881 *Footprint Berlin* Neil Taylor, Nina Hamilton, 2003 Berlin has grown up fast Capital of a reunited Germany only since 1999 it has already earned its international spurs and no longer has to settle for being simply German Visitors can leave Berlin without having experienced Germany American musicals Babylonian mosaics French bakeries and Norman Foster creations are comfortably integrated into the buildings of Schinkel and the operas of Wagner The city that needed a long period in rehab for some serious occupation therapy is now confident enough to woo British architects Italian designers and Polish restorers to join the burgeoning multinational community But though reunified Berlin has undergone a level of transformation rivalled only by post Mao Tse Tung Shanghai it has stuck to its principles The capital of counter culture and inspiration for the likes of David Bowie and Iggy Pop has lost none of its radical cutting edge reputation Eastern wastelands are now Ossi cool where thousands of disused buildings have become squats for underground parties and art galleries Planners are bringing back to life the wastelands that once scarred this capital of divided alliances Not only is Berlin attempting to build a mini Manhattan in its business zones a gentrified NYC TriBeCa in residential Mitte and a London with its new government buildings in Mitte and

Tiergarten but it is bravely facing up to its past by commemorating holocaust victims on land that had visually marked its urban and political dichotomy It is also celebrating its past The former Parliament is back in action and though the royal family is not their statues are back and their palaces are now open to all Trams once ridiculed in the West as a noisy legacy of communism are quietly extending their routes all over the city Only the Nazi era is buried and covered with the rubble that marked its final days The height and size of Berlin s new buildings as well as the pedigree of their architects show the city has no doubt about its long term future Much of the 20th century will in due course be remembered by historians as a grim aberration New generations will hopefully continue Berlin s pioneering spirit at the speed dictated by those in power in the 1990s Berlin is the greenest of cities visually and politically The Grunewald Green Wood is an enormous park to the southwest of the city propping it up like the neck stem of the country s brain The Green Party is in the ruling coalition protecting the proud statistic that Berlin has more trees than shops if not yet more bicycles than cars Its buildings have more glass than concrete and solar energy powers them Berliners are avid recyclers with drinkers returning bottles to shops and train users sorting rubbish into bins on platforms But recycling is just one of many trends that starts as radical spreads elsewhere and then almost becomes conservative Gays came out in the 1920s and so did cyclists and nudists By the time art causes a stir in London or New York it is conventional in Berlin Take a look at the future here and see if you think it works

Schmidt,2021-12-10 There are yet among us men and women who braved the dangers and hardships of a frontier life in order that we may be enjoying the advantages and wealth of the present Some of these have not great wealth and while others are drawing a small pension from the State there are still others who are in dire poverty and never expect to ride on a concrete highway for pleasure and recreation What they want to know more than anything else is that their lives have not been spent in vain that we are actually building on the foundation they have laid and that we appreciate just what they have done Those were strenuous times when pioneer men and women had to be brave and face the dangers that threatened home and children the men could not always be near to protect their

families and their property but seldom do we hear or read of a woman who did not nobly and bravely stand between her loved ones and danger whether from dangerous wild animals marauding redskins or from a devastating prairie fire that often swept the settlement leaving nothing but a black streak of ashes in its wake It is hard indeed for us to realize as we sit beside our peaceful firesides the hardships and perils those brave men and women had to endure when this country was an untamed wilderness Therefore we dedicate this manual to their memory *My Footprints on the Sands of Time* Bethwell A.
