biomedical engineering and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades. As new key technologies arise with significant potential to open new options in diagnostics and therapeutics, it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output. Covering key aspects such as information and communication technologies, micro and nanosystems, optics, and biotechnology, the congress will serve as an inter- and multidisciplinary platform that brings together people from basic research, R D industry, and medical application to discuss these issues. As a major event for science, medicine, and technology, the congress provides a comprehensive overview and in-depth first-hand information on new developments, advanced technologies, and current and future applications. With this Final Program, we would like to give you an overview of the dimension of the congress and invite you to join us in Munich. Olaf D. Ssel, Congress President, Wolfgang C.

*The Dream of a Common Movement* Urvashi Vaid, 2025-03-21. *The Dream of a Common Movement* collects essays, interviews, and speeches by the late feminist and civil rights activist Urvashi Vaid, whose pioneering writing and organizing over the course of four decades fundamentally shaped the LGBTQ movement. Vaid explores the LGBTQ movement's impact on the AIDS epidemic and its challenges as it developed a national presence. She calls out movement leaders and donors for not addressing gender, race, and class issues and passionately argues that the goal of any liberation movement should be transformation, not assimilation. In personal essays, Vaid describes a double consciousness forged by the experience of immigration and a complicated relationship with her Indian American and lesbian identities. Whether she was focused on the Donors of Color Network, the 22nd Century Initiative, the Lesbian Political Action Committee, or other initiatives she launched, Vaid was steadfast in her vision of a more just society and believed deeply in the power of people coming together to effect change. Offering a window into the breadth of her progressive vision for social change, this volume inspires readers to never stop organizing and marching.

**Conservation of Tropical Coral Reefs** Brian Joseph McFarland, 2020-12-16. This book critically engages with how the conservation of tropical coral reefs is financed. Beginning with the context of tropical coral reef degradation and loss alongside an overview of tropical ecology, global environmental policy, and finance, the book reviews several conservation financing instruments. These include ecotourism, debt for nature swaps, impact investments, and government domestic budgetary expenditures. From the Great Barrier Reef to the Coral Triangle to the Mesoamerican Reef, tropical coral reef degradation and loss are serious global environmental issues contributing to loss of revenue and food insecurity for coastal communities and species extinction. Yet many leading companies, individuals, and governments are making a positive impact on tropical coral reef conservation through the use of conservation finance. *Conservation of Tropical Coral Reefs* using 30 case studies which span 23 countries and 6 continents, tells the history of international conservation finance and provides a variety of options for individuals, businesses, and governments to support conservation financing projects.
