The Oxford Handbook of Agricultural History Jeannie M. Whayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor

The Oxford Handbook of Food History Jeffrey M. Pilcher, 2012-10-16 Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism the environment and social inequality to diverse audiences Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald's menus contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself The Oxford Handbook of Food History places existing works in historiographical context crossing disciplinary chronological and geographic boundaries while also suggesting new routes for future research The twenty seven essays in this book are organized into five sections historiography disciplinary approaches production circulation and consumption of food The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself such as the French Annales school and the cultural turn but also in anthropology sociology geography pedagogy and the emerging Critical Nutrition Studies The following three sections sketch various trajectories of food as it travels from farm to table factory to eatery nature to society Each section balances material cultural and intellectual concerns whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents early human migrations with modern culinary tourism or religious customs with social activism In its vast interdisciplinary scope this handbook brings students and scholars an authoritative guide to a field with fresh insights into one of the most fundamental human concerns

Charts and tables *Understanding Globalization* Robert K. Schaeffer, 2003 This best selling text vividly shows how political and economic changes affect people's lives in different settings around the world Globalization the author argues is not completely new Instead the current wave of globalization builds on international institutions created just after World War II and was given new impetus by policies introduced in the 1970s and 80s The new edition has five new chapters as well as updates and changes throughout Visit our website for sample chapters **Globalization and the South** Caroline Thomas, Peter Wilkin, 2016-07-27 This volume brings together a group of authors who share a common concern with the effects of globalization on the South Included among these effects is the accelerating erosion of the social economic and political significance of the territorial distinction on which the terms South and North are founded The authors aim is explicit to offer a unique perspective on globalization which places the transformation of the South and the renewed global organization of inequality at the heart of our understanding of the global order *Trade and Sustainable Development* DIANE Publishing Company, 1994-07 *Building a New Biocultural Synthesis* Alan H. Goodman, Thomas Leland Leatherman, 2010-03-23 Anthropology with its dual emphasis on biology and culture is or should be the discipline most suited to the study of the complex interactions between these aspects of our lives Unfortunately since the early decades of this century biological and cultural anthropology have grown distinct and a holistic vision of anthropology has suffered This book brings culture and biology back together in new and refreshing ways Directly addressing earlier criticisms of biological anthropology *Building a New Biocultural Synthesis* concerns how culture and political economy affect human biology e g people's nutritional status the spread of disease exposure to pollution and how biological consequences might then have further effects on cultural social and economic systems Contributors to the volume offer case studies on health nutrition and violence among prehistoric and historical peoples in the Americas theoretical chapters on nonracial approaches to human variation and the development of critical humanistic and political ecological approaches in biocultural anthropology and explorations of biological conditions in contemporary societies in relationship to global changes *Building a New Biocultural Synthesis* will sharpen and enrich the relevance of anthropology for understanding a wide variety of struggles to cope with and combat persistent human suffering It should appeal to all anthropologists and be of interest to sister disciplines such as nutrition and sociology Alan H Goodman is Professor of Anthropology Hampshire College Thomas L Leatherman is Associate Professor of Anthropology University of South Carolina **Rethinking Sustainability** Jonathan Mark Harris, 2009-11-12 Bringing together the thoughts of economists political scientists anthropologists philosophers and agricultural policy professionals this volume focuses on the issues of sustainability in development Examining such topics as international trade political power gender roles legal institutions and agricultural research the contributors focus on the missing links in theory and practice that have been barriers to the achievement of truly sustainable development Any theory of sustainable development must take into account economic social and environmental dimensions Until recently the question What is

development was often answered predominantly from the economist's perspective with high priority being assigned to expansion of economic output. Social, political, institutional and ethical aspects have often been neglected. But now that sustainable development has become a broadly accepted concept it is impossible to maintain a narrowly economic view of development. For this reason the varied perspectives offered by the contributors to this volume are crucial to understanding the process of development as it relates to environmental sustainability and human well-being. The selection of articles is meant to be stimulating and provocative rather than comprehensive. They are roughly divided between those dealing with broad theoretical issues concerning the economic, political and social aspects of development (Part I) and those presenting more applied analysis (Part II). The common thread is a concern for examining which factors contribute to making development socially just and environmentally sound. Rethinking Sustainability will be of interest to economists and social scientists, development professionals and instructors seeking to offer their students a broad perspective on development issues.

Animal Geographies Jennifer Wolch, Jody Emel, 1998-09-17. Each year billions of animals are poisoned, dissected, displaced, killed for consumption or held in captivity, usually for the benefit of humans. The animal world has never been under greater peril and this broad-ranging collection contributes to a much-needed fundamental rethinking about our relation with it. *Animal Geographies* explores the diverse ways in which animals shape the formation of human identity. Essays on zoos and wolves, for example, reveal how animals figure in social constructions of race, gender and nationality. From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle. It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption, illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human-animal relations. *Animal Geographies* compels a profound rethinking of the nature of human-animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis. Contributors: Kay Anderson, Glen Elder, Andrea Gullo, Unna Lassiter, William S. Lynn, Suzanne M. Michel, Chris Philo, James D. Proctor, Paul Robbins, Frances M. Ufkes, James L. Wescoat Jr.

Development Stuart Corbridge, 2000. Brings together more than one hundred articles dealing with the discipline of development in all its diversity. Key topics include the transformation of peasant economies, agribusiness, rural-urban relations, markets, industrialization, workers, trade, aid and structural adjustment. A unique set in its comprehensiveness and diversity it also considers four key challenges for development theory and practice relating to capabilities, ethics, sustainability and regulation.

Critical Geographies Salvatore Engel-Di Mauro, 2008. **Food in the USA** Carole Counihan, 2013-10-18. From Thanksgiving to fast food to the Passover seder, *Food in the USA* brings together the essential readings on these topics.

and is the only substantial collection of essays on food and culture in the United States Essay topics include the globalization of U S food the dangers of the meatpacking industry the rise of Italian American food the meaning of Soul food the anorexia epidemic the omnipotence of Coca Cola and the invention of Thanksgiving Together the collection provides a fascinating look at how and why we Americans are what we eat *Capitalism and Development* Leslie Sklair,2002-09-11 This collection draws together a distinguished group of authors to explore how capitalism contributes to the development and underdevelopment of the Third World It provides a superb overview of key concepts such as capitalism development modernization and dependency *Critical Perspectives on Globalization and Neoliberalism in the Developing Countries* Richard Harris,Melinda Seid,2021-10-01 This book gives a critique of the contemporary global capitalist system and the adverse consequences suffered by the developing countries as a result of their integration into this system The current neoliberal paradigm of capitalist development as the only or the best alternative for the economic social and political development of the developing countries is rejected The authors search for more human and ecologically sustainable alternatives focusing on Latin America Asia and women Contributors are David Barkijn Robert N Gwynne Richard L Harris Crist bal Kay Jorge Nef Mustapha Kamal Pasha Cathy A Rakowski Wilder Robles Melinda J Seid and John Weeks

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa **Beyond the Large Farm** Paul B.
