Venkatasubramanian, 2023-11-14 *Novices' Gleanings in Bee Culture*, 1921 *Remotely Global* Charles Piot, 2008-11-26

At first glance the remote villages of the Kabre people of northern Togo appear to have all the trappings of a classic out of the way African culture subsistence farming straw roofed houses and rituals to the spirits and ancestors Arguing that village life is in fact an effect of the modern and the global Charles Piot suggests that Kabre culture is shaped as much by colonial and postcolonial history as by anything indigenous or local Through analyses of everyday and ceremonial social practices Piot illustrates the intertwining of modernity with tradition and of the local with the national and global In a striking example of the appropriation of tradition by the state Togo's Kabre president regularly flies to the region in his helicopter to witness male initiation ceremonies Confounding both anthropological theorizations and the State Department's stereotyped images of African village life *Remotely Global* aims to rethink Euroamerican theories that fail to come to terms with the fluidity of everyday relations in a society where persons and things are forever in motion **Appropriations, Budget Estimates, Etc** United States. Food, Drink and Identity in Europe ,2016-08-01 Scholars across the humanities and social sciences are increasingly examining the importance of consumption to changing notions of local regional national and supranational identity in Europe As part of this interest anthropologists historians sociologists and others have paid particular attention to the roles which food and drink have played in the construction of local regional and national identity in Europe This volume provides the first multidisciplinary look at the contributions which food and alcohol make to contemporary European identities including the part they play in processes of European integration and Europeanization It provides theoretically informed ethnographic and historical case studies of transformations and continuity in social and cultural patterns in the production and consumption of European foods and drinks in order to explore how eating and drinking have helped to construct various local regional and national identities in Europe Of particular note in this volume is its attention to how food and drink intersect with recent attempts to foster greater European integration in part through the recognition and support of common and diverse European cultures and identities **Bioterrorism and Public Health** Vitali B. Mellehovitch,2004 Bioterrorism poses a unique challenge to the medical care and public health systems Unlike an explosion or chemical attack which results in immediate and visible casualties the public health impact of a biological attack can unfold gradually over time Until a sufficient number of people arrive at the emergency rooms and doctors offices complaining of similar illnesses there may be no sign that an attack has taken place The speed and accuracy with which the doctors and laboratories reach the correct diagnoses and report their findings to public health authorities has a direct impact on the number of people who become ill and the number that die The nation s ability to respond to a bioterrorist attack therefore depends crucially on the state of preparedness of its medical care systems and public health infrastructure Public health experts have for years complained about the deterioration of the public health system through neglect and lack of funding They warn that the nation is ill equipped and insufficiently prepared to respond to a bioterrorist attack For example they point out that there are too few

medical personnel trained to spot biological attacks a shortage of sophisticated laboratories to identify the agents and inadequate supplies of drugs and vaccines to counteract the threat They also contend that inadequate plans exist for setting up quarantines and emergency facilities to handle the sick and infectious victims Improving public health preparedness and response capacity offers protection not only from bioterrorist attacks but also from naturally occurring public health emergencies Public health officials are increasingly concerned about our exposure and susceptibility to infectious disease and food borne illness because of global travel ubiquitous food imports and the evolution of antibiotic resistant pathogens This book reviews critical issues in the US public system and its vulnerability or lack thereof to bioterrorism
