its importance believing in their arrogance to be able to control it or even make it disappear Experts of all stripes traders and even economists thus boast of predicting the future until they are wrong which inevitably happens Since chance is surely stronger than human reason it would be wiser to be humble If man is irremediably fallible and incapable of thinking correctly would it not be better to take this limitation into account rather than trying to fight it Discover some keys to do so Buy now the summary of this book for the modest price of a cup of coffee The John Mauldin Classics Collection John
