Footprint Britain:

Our Ecological Footprint Mathis Wackernagel, William Rees, 1998-07-01 Our Ecological Footprint presents an internationally acclaimed tool for measuring and visualizing the resources required to sustain our households communities regions and nations converting the seemingly complex concepts of carrying capacity resource use waste disposal and the like into a graphic form that everyone can grasp and use An excellent handbook for community activists planners teachers students and policy makers

The Ecological Footprint Andrea Collins, Andrew Flynn, 2015-05-29 The ecological footprint is one of the most prominent tools used to measure environmental sustainability and its rise in academic and policy debates since the early 1990s has been remarkable Drawing upon research and examples from around the world t Political Ecology and Environmentalism in Britain Brendan Prendiville, David Haigron, 2020-02-24 This collection of essays highlights the different dimensions of the contemporary British environmentalist movement from a multidisciplinary viewpoint Beginning with an historical overview of the movement the reader is then presented with an analysis of the politics of climate change from a political science perspective This is followed by a sociological examination of climate change protesters and environmental activism among young people The volume also includes an analysis of the ideological relationship between political ecology and the British Left as well as a case study of environmentalism in Wales against the backdrop of devolution The book is based on two distinct yet complementary perspectives environmentalism and political ecology What is this distinction and what is its significance Answers to these questions and others can be found in these essays which are a must read for both students and researchers interested in environmental politics in Britain and British area studies *Rethinking Britain* Sue Konzelmann, Susan Himmelweit, Jeremy Smith, John Weeks, 2019-09-19 What if we had a government prepared to implement the policies that could radically change 21st century Britain and improve people s lives Social and economic policies are rarely communicated clearly to the public but it s never been more important for citizens to understand and contribute to the debate around the country s future In everyday language Rethinking Britain presents a range of ideas from some of the country s most influential thinkers such as Kate Pickett and Ha Joon Chang From inflation to tax and health to education each contribution offers solutions which if implemented would lead to a fairer society Curated by leading economists from the Progressive Economics Group and accompanied by a jargon buster this book is an essential aid for citizens who are interested in critiquing inequalities while looking to build a better future **What's Up, Britain?** , 2009

Making One's Way in the World Martin Bell, 2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is

considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

Consumption-based emissions reporting Great Britain: Parliament: House of Commons: Energy and Climate Change Committee, 2012-04-18 The Department for Energy and Climate Change's DECC official CO2 figures that count territorial emissions from power stations and transport etc within UK borders show nearly 20% reduction between 1990 2009 But research commissioned for the Department for the Environment Food and Rural Affairs reveals that CO2 emissions were 20% higher in 2009 if consumption based emissions from imported goods are included The fall in territorial emissions was not mainly the consequence of the Government's climate policy Rather it was the result of the shift in manufacturing industries away from the UK and the switch from coal to gas fired electricity generation that began in the early 1990s Since 1990 carbon dioxide emissions from imports have almost doubled from 166 million tonnes Mt CO2 to 331 Mt CO2 in 2009 If the UK wishes to encourage emissions reductions in countries that manufacture and export goods to the UK the MPs say the Government should recognise the growth in the UK's consumption based emissions Acknowledging that UK consumption is driving up territorial emissions in other countries could increase the UK's leverage over those emissions and help to secure a binding global agreement on carbon cuts There is sufficiently robust data available to develop new policy options and identify carbon intensive behaviours that are overlooked

by concentrating on territorial emissions alone Ministers should explore the options for incorporating consumption based emissions data in to the policy making process and setting emissions targets on a consumption basis at the national level

Feeding Britain Tim Lang,2020-03-26 How does Britain get its food Why is our current system at breaking point How can we fix it before it is too late British food has changed remarkably in the last half century As we have become wealthier and more discerning our food has Europeanized pizza is children s favourite food and internationalized we eat the world s cuisines yet our food culture remains fragmented a mix of mass ultra processed substances alongside food as varied and good as anywhere else on the planet This book takes stock of the UK food system where it comes from what we eat its impact fragilities and strengths It is a book on the politics of food It argues that the Brexit vote will force us to review our food system Such an opportunity is sorely needed After a brief frenzy of concern following the financial shock of 2008 the UK government has slumped once more into a vague hope that the food system will keep going on as before Food they said just required a burst of agri technology and more exports to pay for our massive imports Feeding Britain argues that this and other approaches are short sighted against the public interest and possibly even strategic folly Setting a new course for UK food is no easy task but it is a process this book urges that needs to begin now Tim Lang has performed a public service Simon Jenkins Sunday Times
