*Routledge Handbook of Architecture, Urban Space and Politics, Volume I* Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century. This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics. As a symbol or an effect the spatial dimension is depoliticized. Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role. This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing. Considering both ongoing and unprecedented global problems from violence and urban warfare, the refugee crisis, borderization, detention camps, terrorist attacks to capitalist urbanization, inequity, social unrest and climate change, this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics, architecture and urban space. Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times. The operative and active political reading of space is disseminated through five thematics: Violence and War, Machines, Security and Borders, Race, Identity and Ideology, Spectacle and the Screen, and Mapping Landscapes and Big Data. This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics. This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities. Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license. [The Routledge Companion to Environmental Planning](#) Simin Davoudi, Richard Cowell, Iain White, Hilda Blanco, 2019-07-31 This Companion presents a distinctive approach to environmental planning by situating the debate in its social, cultural, political and institutional context, being attentive to depth and breadth of discussions, providing up to date accounts of the contemporary practices in environmental planning and their changes over time, adopting multiple theoretical and analytical lenses and different disciplinary approaches and drawing on knowledge and expertise of a wide range of leading international scholars from across the social science disciplines and beyond. It aims to provide critical reviews of the state of the art theoretical and practical approaches as well as empirical knowledge and understandings of environmental planning, encourage dialogue across disciplines and national policy contexts about a wide range of environmental planning themes and engage with and reflect on politics, policies, practices and decision making tools in environmental planning. The Companion provides a deeper understanding of the interdependencies between the themes in the four parts of the book: Understanding the environment, Environmental governance, Critical environmental pressures and responses, and Methods and approaches to environmental planning and its 37 chapters. It presents critical perspectives on the role of meanings, values, governance approaches and participations in environmental planning. Situating environmental planning debates in the wider ecological, political, ethical

institutional social and cultural debates it aims to shine light on some of the critical journeys that we have traversed and those that we are yet to navigate and their implications for environmental planning research and practice The Companion provides a reference point mapping out the terrain of environmental planning in an international and multidisciplinary context The depth and breadth of discussions by leading international scholars make it relevant to and useful for those who are curious about wish to learn more want to make sense of and care for the environment within the field of environmental planning and beyond *Rural Planning and Development in Northern Ireland* John Greer, Michael Murray, 2003
