Written by experienced teachers, the book outlines key mathematical concepts and provides a wide range of exciting mathematically rich activities that support the development of these concepts. It exposes some of the common misconceptions and errors that practitioners may observe children showing in their settings and offers simple practical strategies to help move children forward in their thinking and understanding. Covering all areas of mathematics learning: counting and number, calculation, shape and space, pattern, measuring and handling data, the book features practical ideas for supporting assessment, observation, mathematical vocabulary and building links with home activities that promote a child-led approach linked to children's everyday lives and experiences. Guidance on how to extend and challenge children's learning through adult-led, quality teaching and effective practice, a clear sense of progression based on children's understanding rather than age.
