Felicitas Munzel,1999 Currently fashionable among critics of enlightenment thought is the charge that Kant s ethics fails to provide an adequate account of character and its formation in moral and political life G Felicitas Munzel challenges this reading of Kant s thought claiming not only that Kant has a very rich notion of moral character but also that it is a conception of systematic importance

for his thought linking the formal moral with the critical aesthetic anthropological and biological aspects of his philosophy

The first book to focus on character formation in Kant's moral philosophy it builds on important recent work on Kant's aesthetics and anthropology and brings these to bear on moral issues Munzel traces Kant's multifaceted definition of character through the broad range of his writings and then explores the structure of character its actual exercise in the world and its cultivation An outstanding work of original textual analysis and interpretation Kant's Conception of Moral Character is a major contribution to Kant studies and moral philosophy in general Handbook of Behavior, Food and Nutrition Victor R.
