List, 1985 **Medical Entanglements** Kristina Gupta, 2019-10-25 *Medical Entanglements* uses intersectional feminist queer and crip theory to move beyond for or against approaches to medical intervention Using a series of case studies sex confirmation surgery pharmaceutical treatments for sexual dissatisfaction and weight loss interventions the book argues that because of systemic inequality most mainstream medical interventions will simultaneously reinforce social inequality and

alleviate some individual suffering The book demonstrates that there is no way to think ourselves out of this conundrum as the contradictions are a product of unjust systems Thus Gupta argues that feminist activists and theorists should allow individuals to choose whether to use a particular intervention while directing their social justice efforts at dismantling systems of oppression and at ensuring that all people regardless of race gender sexuality class or ability have access to the basic resources required to flourish
