Fatal Freedom:

Fatal Freedom Thomas Szasz, 2002-08-01 Fatal Freedom is an eloquent defense of every individual's right to choose a voluntary death. By maintaining statutes that determine that voluntary death is not legal, Thomas Szasz believes that our society is forfeiting one of its basic freedoms and causing the psychiatric medical establishment to treat individuals in a manner that is disturbingly inhumane. Society's penchant for defining behavior it terms objectionable as a disease has created a psychiatric establishment that exerts far too much influence over how and when we choose to die. In a compelling argument that clearly and intelligently addresses one of the most significant ethical issues of our time, Szasz compares suicide to other practices that historically began as sins, became crimes, and now are seen as mental illnesses.

Faith in Freedom Thomas Szasz, 2017-07-12 The libertarian philosophy of freedom is characterized by two fundamental beliefs: the right to be left alone and the duty to leave others alone. Psychiatric practice routinely violates both of these beliefs. It is based on the notion that self-ownership, exemplified by suicide, is not an inherent right but a privilege subject to the review of psychiatrists as representatives of society. In Faith in Freedom, Thomas Szasz raises fundamental questions about psychiatric practices that inhibit an individual's right to freedom. His questions are fundamental: Is suicide an exercise of rightful self-ownership or a manifestation of mental disorder? Does involuntary confinement under psychiatric auspices constitute unjust imprisonment or is it therapeutically justified hospitalization? Should forced psychiatric drugging be interpreted as assault and battery on the person or is it medical treatment? The ethical standards of psychiatric practice mandate that psychiatrists employ coercion. Forgoing such intervention is considered a dereliction of the psychiatrist's duty to protect. How should friends of freedom, especially libertarians, deal with the conflict between elementary libertarian principles and prevailing psychiatric practices? In Faith in Freedom, Thomas Szasz addresses this question more directly and more profoundly than in any of his previous works.

Suicide Prohibition Thomas Szasz, 2011-10-12 In Western thought, suicide has evolved from sin to sin and crime to crime to mental illness and to semilegal act. A legal act is one we are free to think and speak about and plan and perform without penalty by agents of the state. While dying voluntarily is ostensibly legal, suicide attempts and even suicidal thoughts are routinely punished by incarceration in a psychiatric institution. Although many people believe the prevention of suicide is one of the duties the modern state owes its citizens, Szasz argues that suicide is a basic human right and that the lengths to which the medical industry goes to prevent it represent a deprivation of that right. Drawing on his general theory of the myth of mental illness, Szasz makes a compelling case that the voluntary termination of one's own life is the result of a decision, not a disease. He presents an in-depth examination and critique of contemporary antisuicide policies, which are based on the notion that voluntary death is a mental health problem, and systematically lays out the dehumanizing consequences of psychiatrizing suicide prevention. If suicide be deemed a problem, it is not a medical problem. Managing it as if it were a disease or the result of a disease will succeed only in debasing medicine and corrupting the law. The System of Nature Denis Diderot, O NATURE Sovereign of all beings And you her adored daughters Virtue Reason Truth be forever our sole Divinities To you belong the incense and homage of the earth Show us O Nature The System of Nature *Le Syst me de la nature* 1770 though primarily attributed to Baron d Holbach is thought to have been at least in part a product of Diderot and he absolutely authored its final chapter which summarizes the entire work The System was originally published under the pseudonym Jean Baptiste de Mirabaud and is a foundational work of Enlightenment materialist philosophy Written in collaboration with Denis Diderot the text presents a deterministic atheistic worldview grounded in natural laws An 1822 edition of this text claimed to include notes drawn from a copy that belonged to Diderot though it ultimately offered little new material nonetheless its preface bears the mark of someone well acquainted with Holbach s circle Some passages even suggest Meister s involvement despite his opposition to Holbach s ideas The *Syst me* became a cornerstone of Enlightenment radicalism emphasizing reason empirical inquiry and moral autonomy in place of religious doctrine This modern edition contains a new Epilogue by the translator a glossary of Philosophical Terms used by Diderot a chronology of his core life and works and a summary index of all of Diderot s works With a clean modern translation of Diderot s Enlightenment era French this edition brings Diderot s thoughts directly into the modern intellectual sphere tracing the intellectual forces which swept along Diderot and impacted today s secular world This Enlightenment work laying the foundation of the French Revolution denies the existence of a soul independent of the body dismisses free will as an illusion and rejects final causes or divine purpose in nature Instead it deifies nature as God It is a rationalistic Pantheism creating a Deterministic Theology rooted in belief in the absolute Omnipotence of Newtonian Mechanics resulting in the worship of nature Across two volumes it critiques religious belief as a product of fear and ignorance portraying theology as an obstacle to natural morality defined as the respect for liberty property and security The work provoked significant controversy upon publication leading to its condemnation and public burning by French authorities Despite this it inspired both fierce opposition and philosophical engagement including critiques by Bergier and Voltaire The final chapter *Abr g du Code de la Nature* often attributed to Diderot encapsulates the book s radical ethical vision Baron d Holbach 1723 1789 was a Franco German philosopher writer and encyclopedist who played a key role in the French Enlightenment Born in Edesheim he spent most of his life in Paris where he hosted an influential salon He contributed to spreading Protestant and especially German scientific thought but became best known for his outspoken atheism and his extensive critiques of religion particularly through his major works *The System of Nature* 1770 and *The Universal Morality*

1776 The System of Nature presents one of the Enlightenment's most thorough and provocative articulations of materialist philosophy. In this ambitious work, d'Holbach aims to dismantle the metaphysical and theological systems that in his view have long obstructed rational inquiry and human flourishing. He proposes in their place a naturalistic ontology grounded in empirical experience and the mechanistic laws of nature. While his rejection of religion and metaphysics is uncompromising, the structure and substance of his arguments reveal several inherently contradictory philosophical assumptions, particularly in his treatment of human reason, ethics, religion, and the place of humanity in the cosmos. A key element of d'Holbach's project is the reduction of reason to naturalistic terms. Rather than treating rationality as a transcendent or immaterial faculty, he conceptualizes it as continuous with instinct, emerging from sensual experience and the human organism's need for self-preservation. As one commentary observes, animal reason is indeed nothing else than the animal instinct of self-preservation, whereas in humans the instinct for the satisfaction of its states is beautiful in man without interference, as the animal instinct does not allow. This formulation reinforces d'Holbach's broader rejection of dualism by collapsing distinctions between human and non-human cognition. However, this conceptual flattening introduces ambiguity. While he rejects metaphysical exceptionalism, d'Holbach's view fails to fully capture the complex capacities of reflective judgment and symbolic reasoning that mark human intellectual life. The distinction between reason and instinct, although they are similar, they are not the same, is not sufficiently developed in his analysis, leaving his anthropology under-theorized.

System of Nature by Baron D'Holbach 2 Volumes in One Balraj K. Joshi, 2016-04-23 According to d'Holbach, nature is a great chain of causes and effects. Nature is the great whole comprising everything visible and invisible. Baron d'Holbach gives the laws of the physical world based on laws of motion and gravitation as given by Newton, and he wants to apply the law of attraction and repulsion in the field of morality. All knowledge comes through the sense organs created by the impressions of the world and deposited in the brain, which is the real seat of thought. Man searches for happiness in this world, but the priesthood misguides the people by asking them to look for happiness in future life, as guided by the chimeras of religion. Man living in society should be guided by reason, experience, and sciences by working for his happiness and contributing to the happiness of other members of the society by his hard work, talent, and virtues by being useful to others by satisfying their needs while satisfying his own needs. Happiness is on this earth, and by reason and experience, he can be happy and not as the priesthood preaches in another future life.
