Fateful Transformations:

Fateful Transformations Janusz Duzinkiewicz, 1993 A study of attempts during the late 18th century to reform the Polish Lithuanian Commonwealth culminating in the May Third Constitution which transformed old concepts of cardinal law and confederation into a modern system of government and rule by law *Metamorphosis - Structures of Cultural Transformations* Jürgen Schläeger, 2005 *Darfur Allegory* Rogaia Mustafa Abusaraf, 2021-03-16 The Darfur conflict exploded in early 2003 when two rebel groups the Sudan Liberation Movement and the Justice and Equality Movement struck national military installations in Darfur to send a hard hitting message of resentment over the region's political and economic marginalization The conflict devastated the region's economy shredded its fragile social fabric and drove millions of people from their homes Darfur Allegory is a dispatch from the humanitarian crisis that explains the historical and ethnographic background to competing narratives that have informed international responses At the heart of the book is Sudanese anthropologist Rogaia Abusharaf's critique of the pseudoscientific notions of race and ethnicity that posit divisions between Arab northerners and African Darfuris Elaborated in colonial times and enshrined in policy afterwards such binary categories have been adopted by the media to explain the civil war in Darfur The narratives that circulate internationally are thus highly fraught and cover over to counterproductive effect forms of Darfurian activism that have emerged in the conflict's wake Darfur Allegory marries the analytical precision of a committed anthropologist with an insider's view of Sudanese politics at home and in the diaspora laying bare the power of words to heal or perpetuate civil conflict **Nationalism in Modern Europe** Derek Hastings, 2023-01-12 Derek Hastings's Nationalism in Modern Europe is the essential guide to a potent political and cultural phenomenon that featured prominently across the modern era With firm grounding in transnational and global contexts the book traces the story of nationalism in Europe from the French Revolution to the present Hastings reflects on various nationalist ideas and movements across Europe and always with a keen appreciation of other prevalent signifiers of belonging such as religion race class and gender which helps to inform and strengthen the analysis The text shines a light on key historiographical trends and debates and includes 20 images 14 maps and a range of primary source excerpts which can serve to sharpen vital analytical skills which are crucial to the subject New content and features for the second edition include A chapter examining region religion class and gender as alternative markers of identity throughout the 19th century An enhanced global dimension that covers transnational fascism and non European comparatives Additional primary source excerpts and figures Historiographical updates throughout which account for recent research in the field **Reading Backwards** Muireann Maguire, Timothy Langen, 2021-06-18 This book outlines with theoretical and literary historical rigor a highly innovative approach to the writing of Russian literary history and to the reading of canonical Russian texts Anticipatory plagiarism is a concept developed by the French Oulipo group but it has never to my knowledge been explored with reference to Russian studies The editors and contributors to the proposed volume

a blend of senior and beginning scholars Russians and non Russians offer a set of essays on Gogol Dostoevsky and Tolstoy which provocatively test the utility of AP as a critical tool relating these canonical authors to more recent instances some of them decidedly non canonical The senior scholars who are the editors and most of the contributors are truly distinguished The volume is likely to receive serious attention and to be widely read I recommend it with unqualified enthusiasm William Mills Todd III Harry Tuchman Levin Professor of Literature Harvard University As the founder of the notion of plagiarism by anticipation which was stolen from me in the sixties by fellow colleagues I am delighted to learn that my modest contribution to literary theory will be used to better understand the interplay of interferences in Russian literature Indeed one would have to be naive to think that the great Russian authors would have invented everything In fact they were able to draw their ideas from their predecessors but also from their successors testifying to the open mindedness that characterizes the Slavic soul This book restores the truth Pierre Bayard Professor of Literature University of Paris 8 This edited volume employs the paradoxical notion of anticipatory plagiarism developed in the 1960s by the Oulipo group of French writers and thinkers as a mode for reading Russian literature Reversing established critical approaches to the canon and literary influence its contributors ask us to consider how reading against linear chronologies can elicit fascinating new patterns and perspectives Reading Backwards An Advance Retrospective on Russian Literature re assesses three major nineteenth century authors Gogol Dostoevsky and Tolstoy either in terms of previous writers and artists who plagiarized them such as Raphael Homer or Hall Caine or of their own depredations against later writers from J M Coetzee to Liudmila Petrushevskaja Far from suggesting that past authors literally stole from their descendants these engaging essays contributed by both early career and senior scholars of Russian and comparative literature encourage us to identify the contingent and familiar within classic texts By moving beyond rigid notions of cultural heritage and literary canons they demonstrate that inspiration is cyclical influence can flow in multiple directions and no idea is ever truly original This book will be of great value to literary scholars and students working in Russian Studies The introductory discussion of the origins and context of plagiarism by anticipation alongside varied applications of the concept will also be of interest to those working in the wider fields of comparative literature reception studies and translation studies

The Carrera Revolt and 'Hybrid Warfare' in Nineteenth-Century Central America Gilmar Visoni-Alonzo, 2017-07-18 This book provides a novel analysis of the military campaign of Rafael Carrera during the popular insurrection of 1837 1840 in Guatemala Over the course of three years Carrera a semi literate farmer and his army of peasants established Conservative control over Guatemala and accelerated the disintegration of the Central American Federation Although Carrera s rise has been analyzed from a political and socio economic perspective the present work shows that Carrera s vertiginous success is the product of a peculiar and misunderstood approach to warfare that combines guerrilla recruiting practices and rural insurgency logistics with conventional combat tactics and operations Gilmar Visoni Alonzo argues that Carrera s hybrid warfare was made possible because of the conditions created by the

militarization of Latin American society following the administrative reforms of the Bourbon monarchy in the late eighteenth century The concept of hybrid warfare is offered as an alternative model to understand the success of other insurgencies

Revolutionary Jews from Spinoza to Marx Jonathan I. Israel, 2021-06-06 Defines how Jewish intellectuals of the Enlightenment influenced later European revolutionary movements In the eighteenth and early nineteenth centuries a small but conspicuous fringe of the Jewish population became the world's most resolute intellectually driven and philosophical revolutionaries among them the pre Marxist Karl Marx Yet the roots of their alienation from existing society and determination to change it extend back to the very heart of the Enlightenment when Spinoza and other philosophers living in a rigid hierarchical society colored by a deeply hostile theology first developed a modern revolutionary consciousness Leading intellectual historian Jonathan Israel shows how the radical ideas in the early Marx's writings were influenced by this legacy which he argues must be understood as part of the Radical Enlightenment He traces the rise of a Jewish revolutionary tendency demanding social equality and universal human rights throughout the Western world Israel considers how these writers understood Jewish marginalization and ghettoization and the edifice of superstition prejudice and ignorance that sustained them He investigates how the quest for Jewish emancipation led these thinkers to formulate sweeping theories of social and legal reform that paved the way for revolutionary actions that helped change the world from 1789 onward but hardly as they intended

The Polish-Lithuanian State, 1386-1795 Daniel Z. Stone,2014-07-01 For four centuries the Polish Lithuanian state encompassed a major geographic region comparable to present day Poland Lithuania Belarus Ukraine Russia Latvia Estonia and Romania Governed by a constitutional monarchy that offered the numerous nobility extensive civil and political rights it enjoyed unusual domestic tranquility for its military strength kept most enemies at bay until the mid seventeenth century and the country generally avoided civil wars Selling grain and timber to western Europe helped make it exceptionally wealthy for

much of the period The Polish Lithuanian State 1386 1795 is the first account in English devoted specifically to this important era It takes a regional rather than a national approach considering the internal development of the Ukrainian Jewish Lithuanian and Prussian German nations that coexisted with the Poles in this multinational state Presenting Jewish history also clarifies urban history because Jews lived in the unincorporated private cities and suburbs which historians have overlooked in favor of incorporated royal cities In the seventeenth and eighteenth centuries the private cities and suburbs often thrived while the inner cities decayed The book also traces the institutional development of the Roman Catholic Church in Poland Lithuania one of the few European states to escape bloody religious conflict during the Reformation and Counter Reformation Both seasoned historians and general readers will appreciate the many excellent brief biographies that advance the narrative and illuminate the subject matter of this comprehensive and absorbing volume Soul: Treatment and Recovery Murray Stein, 2015-07-16 Murray Stein is well known as an insightful and pioneering author and academic Soul Treatment and Recovery presents a selection of papers and book chapters spanning his career from 1973 to 2012 The chapters included in this collection speak for Stein's hope that individuals and humanity as a whole can evolve toward greater consciousness and awareness of meaning in daily life The book is presented in four parts each of which represents a stage in Stein's personal development as an author Part One Psyche and Myth presents papers which draw on timeless documents of the soul for the benefit of our generations of humans who are no longer contained within mythic consciousness In Part Two Clinical Themes Stein has selected papers and an interview that explore themes familiar to many clinicians that were raised in his own practical work as a Jungian psychoanalyst Part Three is dedicated to the process of individuation a key notion in analytical psychology which lies at the heart of the Jungian enterprise and is a topic that has occupied Stein throughout his career Finally Part Four presents several papers dealing with the theme of psychology and spirituality a matter of increasing concern to Stein in recent years This unique collection of work will be of great interest to analytical psychologists and psychotherapists as well as academics and students in the field Additionally for anyone invested in the project of self discovery and with the desire to relate more deeply to self and world the papers included here will suggest important points of reference and directions to pursue further **The American Bibliography of Slavic and East European Studies** Patt Leonard, Rebecca Routh, 2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology Handbook of Research on Aestheticization of Violence, Horror, and Power Erdem, M. Nur, Kocabay-Sener, Nihal, Demir, Tuğba, 2020-10-02 Individuals seek ways to repress the sense of violence within themselves and often resort to medial channels The hunger of the individual for violence is a trigger for the generation of violent content by media owners of political power owners of religious power etc However this content is produced considering the individual's sensitivities Thus violence is aestheticized

Aesthetics of violence appear in different fields and in different forms In order to analyze it an interdisciplinary perspective is required The Handbook of Research on Aestheticization of Violence Horror and Power brings together two different concepts that seem incompatible aesthetics and violence and focuses on the basic motives of aestheticizing and presenting violence in different fields and genres as well as the role of audience reception Seeking to reveal this togetherness with different methods research analyses and findings in different fields that include media urban design art and mythology the book covers the aestheticization of fear power and violence in such mediums as public relations digital games and performance art This comprehensive reference is an ideal source for researchers academicians and students working in the fields of media culture art politics architecture aesthetics history cultural anthropology and more
