## **Fatherhood Reclaimed:**

*Fatherhood Reclaimed* Adrienne Burgess, 1998 Providing an exploration of modern fatherhood this book is based on sociological anthropological and historical research It draws on interviews with a wide range of fathers as well as excerpts from diaries and biographies to look at the experience of being a father Fatherhood in Transition Thomas Johansson, Jesper Andreasson, 2017-03-17 This book discusses and analyses the ways in which fatherhood is in transition in contemporary and globalized society The authors identify and examine fathering practices in relation to hegemonic and marginal patterns of masculinity the concept of heteronormativity and sexuality and patterns of segregation class and national differences Contextualised in relation to theories of fatherhood and relevant statistics *Fatherhood in Transition* presents rich empirical material gathered in a number of western countries It focuses on key themes including transnational fathering and families gay fathers and the virtual global arena of fatherhood images found on the internet Containing a number of new discussions about masculinity and fatherhood whilst contributing to and developing existing debates and theories about men masculinity gender and society this book will be of interest to students and scholars across a range of disciplines including Men's Studies Gender Studies Sociology Psychology Media Studies and Cultural Studies

Fragmenting Fatherhood Richard Collier, Sally Sheldon, 2008-09-05 Debates about the future of fatherhood have been central to a range of conversations about changing family forms parenting and society Law has served an important yet often neglected role in these discussions serving as an important focal point for broader political frustrations playing a central role in mediating disputes and operating as a significant symbolic state sanctioned account of the scope of paternal rights and responsibilities *Fragmenting Fatherhood* provides the first sustained engagement with the way that fatherhood has been understood constructed and regulated within English law Drawing on a range of disparate legal provisions and material from diverse disciplines it sketches the major contours of the figure of the father as drawn in law and social policy tracing shifts in legal and broader understandings of what it means to be a father and what rights and obligations should accrue to that status In thematically linked chapters cutting across substantive areas of law the book locates fatherhood as a key site of contestation within broader political debates regarding the family and gender equality Multiple visions of fatherhood evolving unevenly over time across diverse areas of law emerge from this analysis Fatherhood is revealed as an essentially fragmented status and one which is intertwined in complex ways with the legal cultural and political contexts in which discourses of parenthood are produced *Fragmenting Fatherhood* provides an important and unique resource speaking to debates about fatherhood across a range of fields including law and legal theory sociology gender studies social policy marriage and the family women's studies and gender studies *Redefining Fatherhood* Nancy E. Dowd, 2000-07-01 Most fathers parent less than most mothers Those fathers who do parent equally or more so than mothers are poorly supported by our society For children this means a loss of adult care as well as an ongoing and sharply defined differentiation between

fathers and mothers Fathers are not present in children s lives to a significant degree if at all or when they are present they are often rendered socially invisible For many men their parenthood is defined as biological or economic while a minority of men struggle against the presumption that they are not caregivers In *Redefining Fatherhood* Nancy Dowd argues that this skewed social pattern is mirrored and supported by law Dowd makes the case for reenvisioning fatherhood away from genes and dollars and toward nurture Integrating economic social and legal aspects of fathering she makes the case for focusing on social nurturing behavior as the core meaning of fatherhood In this nuanced and complex analysis she explores the barriers to redefinition including concepts of masculinity the interconnections between fathers and mothers male violence and homophobia *Redefining Fatherhood* offers a progressive view on how men and society at large can change understandings and practices of fatherhood

life the search for a connection forged by love permeates every facet of human existence from our desire to be accepted or our longing to be needed to our fury at being rejected Sometimes love is the stuff of happiness fulfilling in every regard But there are also times when love makes us do things we should not do sometimes it turns us into people we do not want to become The commonality between love that satisfies and love that destroys is the bond between people who open themselves to the vulnerability of love Examination of the theme of familial bonds in film and television explores how the process of forming and maintaining those bonds complicates revises and reproduces ideas about love The chapters in this book explore how the nature of bonds and familial responsibility inform a popular cultural dialogue about the changing nature of the American family over the past sixty years

Caroline Bledsoe, Susana Lerner, Jane Guyer, 2000-02-10 This volume challenges the orthodox position on two of the main themes in fertility transition studies the inevitable link between fewer children and quality of life and the focus on women as the sole important objects of study In an era of unprecedented fertility decline there is increasing concern about the lessening worldwide role that men play in the upbringing of children The immense worldwide variation in the timing and sequencing of a man's life course events the rise and fall in personal fortunes and the weight of society's hierarchies all combine to affect the number of children a man fathers when he fathers them the number of partners he fathers them with and the kind of support and recognition he bestows on them The cross disciplinary approach favoured here including ethnographies national surveys and historical texts avoids the narrow focus of many fertility studies texts By providing detailed studies on a variety of countries ranging from Germany to Papua New Guinea the contributors build an accurate picture of the global situation while two Overview chapters give a wider perspective and the Introduction synthesizes the themes identified and conclusions reached

#### **Promoting Men's**

**Mental Health** David Conrad, Alan White, 2018-04-17 A welcome and important contribution to a thankfully growing debate. Mental illness remains in some ways the last great taboo in our society a taboo which leads directly to stigma and discrimination which for some can be even worse than the symptoms of their illness. This book in part is about encouraging men who have reached crisis point to seek help. Equally it is about prevention and sets out some of the excellent work being done on that. I hope it can inspire practitioners and policy makers to initiate similar interventions develop new ones and lift the promotion of men's mental health much higher up the agenda both in the UK and abroad. A Foreword by Alastair Campbell. Men in all their diverse groups settings lifestyles and stages of life can face considerable challenges to their mental wellbeing from specific cultural and societal factors causing difficulties for themselves and those who live and work with them. In addition these men may respond better to certain approaches and treatment. Promoting Men's Mental Health outlines the breadth of the challenges and provides guidance for those working in primary care on targeting and helping men who need support. Good mental health is more than the absence of mental illness and this book therefore highlights methods to promote positive mental health by increasing psychological wellbeing competency and coping skills and by creating supportive living and working environments. The book highlights examples of best practice throughout the UK Europe and America and will be essential reading for primary care and mental health professionals and all those with an interest in men's mental health. We need to be more innovative in the way we try to reach men. This book will help stimulate further discussion and hopefully encourage men to seek help or support.
